

GeoShred 7

This is GeoShred, an award-winning, fluidly expressive musical instrument that runs on multi-touch devices **and the Mac**. It comes equipped with a guitar physical model and 22 modeled effects. Plus you can expand your musical pallet with 33 additional physically modeled instruments from around the world all available as in-app-purchases (IAPs).

Props

"...one of the most innovative, groundbreaking products to emerge in the past twelve months"
- **Electronic Musician, 2017 Editor's Choice**

"GeoShred is brilliant- it's a real instrument."
- **Eddie Jobson**

"A fantastic new invention which is going to revolutionize the way music is played, expressed and learned! 'GeoShred' is one of the foremost best musical inventions I've had the pleasure to experience in recent years. Definitely 5 stars out of 5! GIGANTASTIVISSIMO.....R...A...Z !!!!!"
- **Patrick Moraz**

"That's just nuts. You're [Jordan] the best-guitarist-without-a-guitar of all time."
- **Joe Satriani**

"GeoShred is a breakthrough [musical instrument] for the iPad. Some might think it's the best evidence yet that there has indeed been reverse engineering of alien technology, but if that's the case, then aliens play guitar... and worship Jimi Hendrix."
- **Craig Anderton, Harmony Central**
