FOREWORD

It is my great pleasure to introduce the Cambodia Statistical Yearbook 2021 to all users. The Statistical Yearbook is the principal reference compendium produced by the National Institute of Statistics, Ministry of Planning. It provides a comprehensive statistical overview of various aspects of Cambodia which related to population, environment, economy and society.

The statistics contain in this Statistical Yearbook reflect the considerable progress that has been made in the development of Cambodia's official statistics under the leadership of the Royal Government of Cambodia, with **Samdech Akka Moha Sena Padei Techo HUN SEN**, Prime Minister of the Kingdom of Cambodia.

These statistical data were gathered from the ministries and institutions of the Royal Government of Cambodia, from the results of censuses and surveys conducted by the National Institute of Statistics, Ministry of Planning. Accurate, reliable and timely official statistics are critical for decision-making, implementation, monitoring and evaluation of the Royal Government's policies and programs. Official statistics are of great benefit to development partners in assessing the effectiveness of programs and projects.

I would like to take this opportunity to thank all ministries and institutions of the Royal Government in contributing their sectoral statistics for inclusion in this Statistical Yearbook. My thank also to H.E. Ms. **Hang Lina**, Delegate of the Royal Government of Cambodia in-charge of Director General of the National Institute of Statistics and all officials for their considerable efforts in producing this publication.

**Senior Minister
Ministry of Planning**

PREFACE

The Cambodia Statistical Yearbook 2021 is produced by officials of the National Institute of Statistics, Ministry of Planning. This edition of Statistical Yearbook builds on previous editions.

The content of statistical data containing in this book consists of brief history of Cambodia, the government and general aspects of some areas such as environment and climate, public finance, population, housing, labour, education, health, agriculture, industry, construction, transportation, post and telecommunications, tourism, investment, price, and national accounts.

I would like to express my sincere thanks to H.E. **Kitti Settha Pandita Chhay Than**, Senior Minister, Minister of Planning for his strong leadership and support in the preparation and production of this Statistical Yearbook.

The Cambodia Statistical Yearbook is prepared through the collaborative efforts of all departments of the National Institute of Statistics, as well as the ministries and institutions of the Royal Government of Cambodia that freely contribute their data and their assistance and collaboration is gratefully acknowledged. I would like to express my appreciation and thanks to officials of the National Institute of Statistics and statistical officials of the line ministries and institutions of the Royal Government that helped with compilation of this edition.

**Delegate of the Royal Government of Cambodia
in-charge of Director General of the National Institute of Statistics**

Brief History of Cambodia

The earliest recorded history of Cambodia starts with the Funan dynasty. The Kingdom of Funan was situated in what is known today as the southern province of Takeo and lasted for a period of 600 years after Funan dynasty Chenla dynasty (sixth century to seventh century). This dynasty gave way to the powerful Angkor Empire that was eventually responsible for establishing the Khmer Kingdom, as we know it today. The following generation of powerful kings that belonged to the Angkorian dynasty is believed to have come from India. The dynasty reigned for a period of 650 years, and their empire covered much of South East Asia. Their territory stretched from Myanmar, which lies east, to the South China Sea and further north, right up to also China.

Khmer kings, during this golden period of rule, built the most ornate and extensive temples or prasats known to mankind. These spectacular constructions were built throughout the kingdom, Angkor Wat, is of course the most famous. Amongst the most successful of the Angkorean kings were Preah Bat Jayavarman II, Preah Bat Yasovarman I, Preah Bat Suryavarman II, and Preah Bat Jayavarman VII. Besides building the most majestic prasats on earth, they were also responsible for huge agricultural feats of engineering which included sophisticated irrigation systems, great water reservoirs, and countless canal systems that guaranteed food transport. Some of these systems are still in use even today. Angkor became the capital of a great kingdom and the center for government, education, religion, and commerce. However, in the late 13th century a sudden shift of power took place. Angkor was invaded and eventually, completely ravaged. The entire population and wealth of a once proud civilization was abandoned and covered by tropical forest.

Following the abandonment of Angkor, Cambodia's capital population migrated south to Long Vek, then further to Ou Dong, and eventually to Phnom Penh. The destruction of the mighty Angkorian capital also caused a decline, adaptation, and eventual replacement of Hinduism. Theravada Buddhism became the national religion. From the 15th century to the 17th century, Cambodia was often encroached on by neighboring Thai and Vietnamese forces. They resisted, but eventually succumbed to a European colonial power.

In 1863, Preah Bat Norodom signed a Protectorate Treaty with France, which consequently placed Cambodia under French rule for the next 90 years. After the death of Preah Bat Norodom in 1904, Preah Bat Sisowath, young brother of King Norodom, was subsequently crowned as the new king of Cambodia (1904-1927) and King Monivong, son of King Sisowath (1927-1941). However, the throne returned to the Norodom family with the following coronation of Preah Bat Norodom Sihanouk in 1941. At that time he was only 18 years old.

Shortly after that, during the Second World War in 1945, the Japanese ousted the French. King Norodom Sihanouk took the opportunity to free Cambodia from foreign control. For many years following, he campaigned tirelessly for this objective, and was eventually rewarded. Cambodian was granted its independence in 1953. The Independence ceremony marked the end of 90 years of French protectorate rule. In 1959, King Norodom Sihanouk abdicated the throne, turning the position of Kingship over to his father, Preah Bat Norodom Suramarith (1955-1960). Then, Prince Norodom Sihanouk became the Head of Sangkum Reastr Niyum.

From 1950 through to 1970, the Kingdom of Cambodia was self-sufficient and prosperous. It excelled in many areas of development. Cambodia was then known as the Jewel of the Orient. Unfortunately, the prosperity was to be short lived. As war started to escalate in Vietnam, Cambodia's borders increasingly became the targets of American and Vietnamese aggression. On March 18th, 1970, General Lon Nol, backed by the Americans, overthrew the Head of State Prince Norodom Sihanouk. Consequently, Cambodia became

deeply involved in the war, fighting mainly against the Khmer Rouge. General Lon Nol's control over Cambodia's government lasted for a period of barely five years, being eventually overthrown by the Khmer Rouge, headed by Pol Pot on the 17th of April 1975.

History repeated itself once again as soon as Pol Pot invaded. The entire population evacuated the city leaving a once vibrant capital in ruin and decay. After the evacuation, The Khmer Rouge tricked Prince Norodom Sihanouk in to returning to Phnom Penh to be Head of State, however, he was not allowed to carry out his responsibilities as Head of State and he was not allowed to leave the Palace walls. In effect, he was placed under house arrest. The Khmer Rouge then proceeded to implement a “reign of terror” on the Cambodian peoples. People were brutally forced to work as slaves in the rice fields. These people had to endure long periods of hard, painful labor while effectively being starved at the same time. Pol Pot's Kampuchean regime established forced labor camps, and tortured, killed or starved an estimated 2 million people, including women and children.

In 1979, The People's Republic of Kampuchea, supported by Vietnamese, liberated the capital. This presented the opportunity for the country to become reestablished once again. Throughout the 1980's the common people rebuilt their economy. In 1989, the Vietnamese withdrew from Cambodia and the country was re-named “State of Cambodia”. In 1991, the Paris Peace Accords created the United Nations Transitional Authority (UNTAC), which was backed by some 22,000 United Nations troops to prepare the first, free and fair general election.

In May 1993, UNTAC supervised Cambodia's first general election. His Majesty Preah Bat Norodom Sihanouk was reinstated as King. Since that time, three further general elections have been held in Cambodia. The second general election was held in July 1998, the third general election in July 2003, the fourth general election in July 2008, 5th General Election in July 2013 and the last general election was held in July 2018.

In 2004, His Majesty Preah Bat Norodom Sihanouk Varman decided to retire. His Majesty Preah Bat Norodom Sihamoni became the King of Cambodia in October 2004.

Today, the Kingdom of Cambodia is once again a peaceful place to visit. Cambodia now incorporates a Parliamentary Government system, with His Majesty Preah Bat Norodom Sihamoni, King and Head of State; Samdech Akka Moha Thamma Pothisal **CHEA SIM** (from 1999-2015), President of the Senate and then Samdech Vibol Sena Pheakdei **SAY CHHUM** (from 2015 to present), President of the Senate; Samdech Akka Moha Ponhea Chakrei **HENG SAMRIN**, President of the National Assembly; and Samdech Akka Moha Sena Padei Techo **HUN SEN**, Prime Minister of the Kingdom of Cambodia. His Majesty is effectively the symbol of national unity for the people of Cambodia who hold him dear to their hearts.

Cambodia has a land area of 181,035 square kilometers in the southwestern part of the East Asia peninsula, about 20 percent of which is used for agriculture. Cambodia lies completely within the tropics with its southernmost points slightly more than 100 above the Equator. The country's capital city is Phnom Penh, which is located in central Cambodia. International borders are shared with Thailand, the Lao People's Democratic Republic on the west and on the north, and the socialist Republic of Vietnam on the east and southeast. The country is bounded on the southwest by the Gulf of Thailand.

Cambodia is a geographically compact country if comparing with its neighbors, administratively composed of 24 provinces and one capital. The country has a coastline of around 440 km and extensive mangrove forests.

The Mekong River is Cambodia largest river, and dominates the hydrology of the country. The river originates in mainland China, flows through Myanmar, Laos, and Thailand before entering Cambodia. At Phnom Penh, with its alternative arms, the Bassac River from the south, and the Tonle Sap River linking with the “Great Lake” Tonle Sap, from the northwest, it continues further southwestward to its lower delta in Vietnam and to the south China Sea.

Maximum temperatures of higher than 33o Centigrade, are common and, just before the start of the rainy season in March and April; they may rise to more than 38o Centigrade. Minimum temperatures rarely fall below 10o Centigrade. January is the coldest month, and April is the warmest.

Average annual rainfall is between 142 and 200 centimeters. Rainfall from April to September in the Tonle Sap Basin-Mekong Lowlands area average 110 to 190 centimeters annually, but the amount varies considerably from year to year. This area of greatest rainfall, however, drains mostly to the sea. Only a small quantity goes into the rivers flowing into the Tonle Sap Basin. The relative humidity in Cambodia is high at night throughout the year. During the daytime in the dry season, humidity averages about 50 percent or slightly lower, but it may remain at around 60 percent in the rainy period.

The forests of Cambodia are diverse and comprise a variety of evergreen, mixed and mangrove forest types. Current estimates of remaining natural forest cover vary considerably, but the consensus is that about half of Cambodia’s land area has some form of forest cover.

Cambodia's coastal area is mountainous, plateau, plain, coast, seaside and gulf. There is much sand in this area. Palm oil, rubber, coconuts, pepper, durian and other crops can be grown in this area. It is also rich in varieties of mangrove.

Since 1993, the Royal Government of Cambodia enacted several key pieces of environmental legislation to establish the legal framework to control, use and manage its natural resources and urban environment. The Ministry of Environment (MoE) is the key agency responsible for environmental protection and natural resources conservation, while the Ministry of Agriculture, Forestry and Fisheries (MAFF) is responsible for forest management.

Parks/wildlife reserves/ conservation areas	Location	physiographic aphic region	Park area '000' ha	Forest cover area '000' ha	Salient features
A. National park					
1. Kirirom	Kampong Speu Koh Kong	Mountain- Coastal	35.0	33,902	High elevation pine forest, large mammals including tiger, bunting and gaur
2. Phnom Bokor	Kampot	Coastal	140.0	136,610	High elevation Sphagnum bogs, tiger, elephant, sun bear
3. Kmp	Kampot	Coastal	5.0	923	Secondary low land evergreen forest
4. Ream	Preah Sihanouk Koh Seeh Koh Thmey	Coastal	21.0	11,328	Secondary low land evergreen forest with some mangrove forest; two small islands (6,000 ha)
5. Botum Sakor	Koh Kong	Coastal	171.3	108,885	Lowland evergreen forest, mangrove forest, and the only coastal <i>Dacrydium/ Podocarpus</i> swamp forest
6. Phnom Kulenh	Siem Reap	Tonle Sap	37.5	20,747	Watershed of Siem Reap River, important archaeological site
7. Virachey	Ratanak Kiri and Stung Treng	Mountain/ Plateau	332.5	329,524	High altitude forest in the north Cambodia, important habitat for tiger, elephant and possibly Douc Langur (an endangered primate)
B. Wildlife Sanctuaries					
8. Aural Sanctuary	Koh Kong Pursat, Kampong Chhnang Kampong Speu	Mountain- Coastal/ Tonle Sap	253.7	191,230	Highest Mountain in Cambodia (5,810 ft), vegetation ranging from dry Dipterocarps to medium altitude evergreen forest; larger parts are botanically not described; tiger, bunting and gaur
9. Bueng Per Sanctuary	Kampong Thom Preah Vihear	Tonle Sap	2,425.0	136,928	
10. Peam Krasop Sanctuary	Koh Kong	Coastal	23.8	15,785	Mangrove forest, the most extensive within the gulf of Thailand
11. Phnom Samkos Sanctuary	Koh Kong Pursat	Coastal	333.8	269,977	High altitude area, variety of forest; tiger, bunting and gaur and the endangered Eld's deer
12. Roiem Daun Sam Sanctuary	Battambang Banteay Meanchey	Tonle Sap	178.8	2,499	Lowland evergreen and semi-evergreen forest, unknown condition; no forest exists across the Thai border; possibly hold pileated gibbon (endangered primate)
13. Kulen-Promptep Sanctuary	Siem Reap	Tonle Sap-		253,946	Principal habitats are lowland dipterocarp forest; lowland evergreen semi evergreen forest, largest swamp
	Preah Vihear	Mountain	402.5	253,946	
14. Lomphat Sanctuary	Ratanakiri Mondul Kiri	Mountain	250.0	205,430	Kouprey Reserve before civil war, evergreen forest on basaltic soils, grassy glades, riverine habitats and small wetland; Bunting and Asian wild dog are present, breeding ground for sarus crane.
15. Phnom Prich Sanctuary	Mondul Kiri	Mountain	222.5	209,907	Habitats similar to Lomphat, mostly evergreen forest, grassy glades, riverine habitats and small wetlands; bunting, Asian wild dog, elephant migrate certain times, breeding ground for sarus crane
16. Phnom Nam Lear Sanctuary	Mondul Kiri	Mountain	47.5	36,901	Evergreen forest; tiger, elephant, pygmy loris and green peafowl
C. Protected Land Scape					
17. Angkor	Siem Reap	Tonle Sap	10.8	4,050	Forest area; Angkor Temple complex
18. Banteay Chhmar	Banteay Meanchey Oddar Meanchey	Tonle Sap	81.2	8,010	Archaeological and cultural sites, including an important temple sites
19. Preah Vihear	Preah Vihear	Mountain	5.0	2,852	Archaeological and cultural sites, including an important temple sites
D. Multiple Use Management Area					
20. Dong Peng	Koh Kong	Coastal	27.7	12,480	Lowland coastal wetland, mostly swamp forest; also some evergreen
21. Samlaut	Battambang Pailin	Tonle Sap	60.0	46,619	Evergreen forest, watershed of Battambang River; denuded by mining operations causing severe erosion and increased sedimentation of the river, flowing in to the Tonle Sap Lake
22. Tonle Sap	Kampong Chhnang Kampong Thom Siem Reap Battambang Pursat	Tonle Sap	316.2	220,859	Long standing reserve, ichthyological reserve; biological, hydrological and cultural/economic importance

In the transitional period between the signing of the Paris Peace Agreements in October 1991 and a free national election conducted by United Nations Transitional Authority in Cambodia (UNTAC) in May 1993, Cambodia was governed by a Supreme National Council (SNC), representing all four major political parties. Administration of the country was temporarily entrusted to UNTAC, following the installation of an interim Provisional Government; the elected Constitutional Assembly adopted and promulgated on September 24 1993, the nation's constitution. The constitution proclaimed His Majesty King Norodom Sihanouk as head of state and established the Royal Government of Cambodia (RGC) within a framework of parliamentary democracy. This same date marked the official end of UNTAC's mandate.

The first national general election in 1993 led to the formation of a coalition government with Samdech Krom Phreah Norodom Ranariddh from the Front uni national pour un Cambodge indépendant, neutre, pacifique et coopératif (FUNCINPEC) as the first Prime Minister and **Samdech Hun Sen** from Cambodian People's Party (CPP) as the second Prime Minister until July 1997.

The second national general election took place in 1998 leading to the formation of the second mandate of a coalition government. **Samdech Hun Sen** from CPP became the Prime Minister. The coalition government was formed up with three major parties: CPP, FUNCINPEC, and Sam Rainsy Party (SRP).

The third national general election was held in July 2003 that led to the formation of another third mandate of a coalition government in July 2004 with **Samdech Hun Sen** as the Prime Minister. The coalition government was formed up with the CPP and FUNCINPEC.

The fourth national general election was held in 2008 and the CPP received the majority of the votes. **Samdech Akka Moha Sena Padei Techo Hun Sen** from the CPP has stayed on as the Prime Minister and the government consisted of only CPP ministers.

The fifth national general election on 28 July 2013 and the CPP received the majority of the votes. **Samdech Akka Moha Sena Padei Techo Hun Sen** from the CPP has stayed on as the Prime Minister and the government consisted of only CPP ministers.

The sixth national general election on 29 July 2018 and the CPP received the majority of the votes. **Samdech Akka Moha Sena Padei Techo Hun Sen** from the CPP has stayed on as the Prime Minister and the government consisted of only CPP ministers.

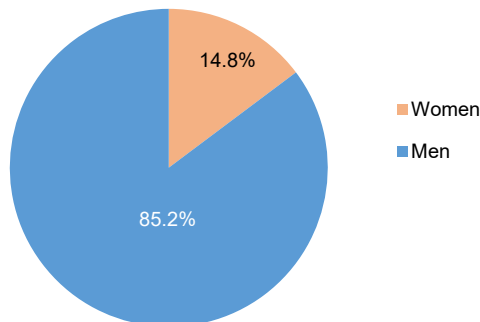

In 2016 there were 193,037 civil servants employed. The number of civil servants has increased since 2011 with about 16,000 employees. There has been a slight increased, however, since 2015 with about 4,000 civil servants. Ministry of Education, Youth and Sports have had the largest increased in 2016. And Ministry of Health have had the decrease in 2016. At provincial level, there are about 155,454 public civil servants. The vast majority work in the education sector, with more than 111,000 employees.

Note:

5/ The Fifth General Election was held on 28 July 2013 with 11 political parties competing for 123 seats in 24 constituencies.

The term of legislature is for 5 years.

4/ The Fourth General Election was held on 27 July 2008 with 11 political parties competing for 123 seats in 24 constituencies.

The term of legislature is for 5 years.

3/ The Third General Election was held on 27 July 2003 with 27 political parties competing for 123 seats in 24 constituencies.

The term of legislature is for 5 years.

2/ The Second General Election took place on 26 July 1998 with 39 political parties competing for 122 seats in 22 constituencies.

1/ The resolution of the conflict in Cambodia through the Paris Peace Accord of 23 October 1991 provided that the elections be held in order to establish the rule of law and to create a governing institution for the country. As a result, the First General Election was held nationwide on 23 May 1993 to elect a Constitutional Assembly. There were 21 constituencies to elect 120 parliamentarians.

The First General Election was organized by United Nations Transitional Authority in Cambodia (UNTAC).

Public or government finance statistics are produced by the Ministry of Economy and Finance (MEF) on a monthly basis and are based on data source from the National Treasury and other departments within MEF. For more detailed statistics should refer to the MEF monthly State Budget Implementation Report.

According to data furnished by MEF, total government revenue for 2015 was 16,229.2 billion Riels, compared to 15,809.5 billion Riels in 2014 increased by 3.0 percent.

Total tax revenue increased 16.1 percent from 9,336.5 billion Riels in 2014 to 10,839.8 billion Riels in 2015. The main increase of tax revenue was due to revenue from indirect and trade taxes. Domestic tax revenue from direct taxes was 8,831.2 billion Riels in 2015 and 7,453.2 billion Riels in 2014. The main contributors to the increases were profit taxes, land and property tax. Indirect taxes increased by 7.8 percent from 3,415.5 billion Riels in 2014 to 3,680.4 billion Riels in 2015. The main contributors to this increase caused from excise taxes and value added taxes (VAT). Taxes on international trade increased from 1,883.3 billion Riels in 2014 to 2,008.6 billion Riels in 2015. The main factors of this increase were mainly export and import taxes with the major increase from taxes on imported petroleum.

Non-tax revenue decreased about 32.3 percent from 2,075.9 billion Riels in 2014 to 1,405.8 billion Riels in 2015. Capital revenue from direct sources decreased from 184 billion Riels in 2014 to 121.4 billion Riels in 2015.

Overall government expenditure for 2015 was about 14,311.6 billion Riels, compared to 13,974.3 billion Riels in 2014, which is increased by 2.4 percent. Current expenditure increased about 7.6 percent from 8,422.6 billion Riels in 2014 to 9,066.8 billion Riels in 2015, of which defense and security expenditure increased by 9.8 percent. Civil administration expenditure increased by 3.5 percent, of which salaries payment increased about 17.3 percent while other payment in civil administration slightly decreased 4.9 percent. Interest payments also decreased 49.8 percent in 2015. Capital expenditure increased from 5,551.7 billion Riels in 2014 to 5,244.8 billion Riels in 2015, which is decreased by 5.5 percent.

Population

In chapter 5, it is briefly described an overview of Cambodian population’s today development, regarding to some demographic indicators including population changes, population density, population of marriage and dependency, and number of households in the period of 2013 and 2018. The main sources for this population chapter are obtained from General Population Censuses of Cambodia (GPCC), Cambodia Inter-census Population survey 2004 and 2013 (CIPS), Cambodia Socio-Economic Survey 2017 (CSES2017), Population projection 2008-2030 and Provision population census 2019. Plus, there is doing forecasting for the number of households by calculating from the number in previous years. For further detailed information about these statistics could be found in various publications produced by NIS (National Institute of Statistics) in Cambodia.

There is a slight growth in number of populations in Cambodia from 15.1 to 16.0 million over the period 2013-2018, obtained from population projection. Compared number of populations gotten from census in 2008 and from population projection in 2018, almost 3 million people in both sexes are increasing. There is a decline of average annual growth rate between 2018 and 2019 due to comparing and calculating with different sources, such as number from projection based on the old years and the provision population census 2019. Generally, the number from projection is higher or lower from reality. In here, annual growth rate was increase gradually since the past, so the trend tends to be high in 2019. Thus, it becomes the result of the negative annual growth rate in 2019.

Moreover, there is a gradual increase in number of households in urban, which completely contrast to number in rural area. Based on Provision population census 2019, there are quite interesting factors that make Phnom Penh where has only 679 square km², far smaller than other provinces, hold the big number of people. For instance, Phnom Penh is a core domain which provides variety of educational opportunities and employment opportunities. Surprisingly, in 2018, people move dramatically from other provinces to live in Phnom Penh, increasing to 2 million in number of people. Among all the provinces and cities, Phnom Penh is one main location that holds around 3 000 people per km². Being noticed, the data is analyzed when Tbong Khmum province is still considered being in Kampong Cham province while the number of populations is done by projection, depending on the number of Census 2008.

Of all the range of ages, people who are 20 to 24 years old have the highest number, around 1700, followed by the number of new born baby aged from 0 to 4 in the period between 2013 and 2018. It could be a good sign for showing that Cambodia reaches a good number of human resources in working both as white and blue collars while people aged from 15 to 29 have the high number. Plus, in rural area, there is a quite great number for people who are 20 to 24 years old, quite been a bit different with number of people in urban areas which people aged 20 to 29 gets the great number in 2018. In contrast, the small number of older generation group is adjusted very little; it is caused by killing action in 1979, Khmer Rouge regime. In term of sex ratio, there is 1 increased for the last three years for both sexes in urban area. Besides, for the last 2 years, all sex ratios remain constant in both rural and urban areas.

Today, Cambodia has strong development in all fields, and women are fully encouraged to involve in all of those. Thus, women tend to be delaying their married and more easily getting divorce than men. The report of CSES 2017 indicated that the percentage of men who is married and living together is a bit higher than the percentage of women, 58.2 and 54.5. However, the high possibility of being divorce is standing on the women side, 2.7 percent compared to 0.7 percent of men. Therefore, this chapter provides the overview of the changed population in Cambodia over some recent periods of time, distributed by geographical domain, age, marital status, ethnicity and migration.

Note:

- 1- There were three censuses since the decade 60s, population census in 1962, 12 years before Khmer Rouge took power; then after 1998 and the last census in 2008. The general population census of Cambodia in 1998 and 2008 were conducted within complete ten years, at 3 March.
- 2- CIPS: Cambodia Inter-censal Survey in 2013 which was conducted 5 years after population census 2008.
- 3- Beside that, data based on administrative reports and population projection. From 1981 to 1993, population was estimated from the population count at the end of 1980 and assumed a growth rate of 2.8% annually from 1981 to 1989 and 2.5% from 1990 to 1993. Population estimation in 1994 was based on provincial reports.
- 4- Population projection 2008-2050

Note: Urban and rural area here, which school is in the urban and rural area is determined by the respective District Education Office and or Provincial Education Service (PES). (DEO) Usually however, school located in large towns or cities are classified as urban schools whereas, those located in isolated areas where communication with and transportation to the schools are difficult are grouped into remote school. The rest are rural schools. Within this given context, the urban area comprises of four municipalities of Phnom Penh, Kep, Preah Sihanouk, Pailin and all provincial towns. Where the population density of an area is less than 10 people (<10 person/km²), the area is termed remote. The rest fall under rural.

Note: Urban and rural area here, which school is in the urban and rural area is determined by the respective District Education Office and or Provincial Education Service (PES). (DEO) Usually however, school located in large towns or cities are classified as urban schools whereas, those located in isolated areas where communication with and transportation to the schools are difficult are grouped into remote school. The rest are rural schools. Within this given context, the urban area comprises of four municipalities of Phnom Penh, Kep, Preah Sihanouk, Paulin and all provincial towns. Where the population density of an area is less than 10 people (<10 person/km2), the area is termed remote. The rest fall under rural.

Note: For women with two or more live births in the five-year period, data refer to the most recent birth. If more than one source of ANC care was mentioned, only the Provider with the highest qualifications is considered in this tabulation Total includes women missing information on antenatal care, who are not shown separately.

Source: Cambodia Demographic and Health Survey 2010 and 2014

Note: Table includes only persons who paid cash or who reported no cash. One US\$=4,000 Riels.

Total includes 4 persons for whom information on severity of illness is not available.

Figures in parentheses are based on 25-49 unweighted cases.

An asterisk indicates that a figure is based on fewer than 25 unweighted cases and has been suppressed.

na = No third treatment was reported
