GOVERNMENT OF NORTHERN IRELAND GENERAL REGISTER OFFICE

Census of Population 1961

COUNTY OF ANTRIM

Printed and presented pursuant to 9 Eliz. 2, Chap. 8

BELFAST: HER MAJESTY'S STATIONERY OFFICE 1964

INTRODUCTION

In accordance with the Census Act (Northern Ireland), 1960, a Census of the population was taken on the 23rd April, 1961, which was also the date of Censuses in the other parts of the United Kingdom. It was the fourth since the establishment of the Government of Northern Ireland, previous Censuses having been taken in 1926, 1937 and 1951.

The 1961 Census was much fuller, as regards the number and scope of the questions, than any of its predecessors. Compared with the 1951 enumeration, the basic questions were much the same but enquiries about nationality, education, occupation and employment were substantially modified. New questions asked for information concerning persons with certain scientific and technological qualifications, the number of children of women who were or had been married, the type of accommodation occupied by private households, whether such accommodation was owned or rented and the extent to which piped water, cooking and toilet facilities were available.

In November, 1961, a Preliminary Report was published giving population figures for each county, county borough and administrative area, together with information on the ages and religious denominations of the people by counties and county boroughs, and the numbers of private dwellings and households in each administrative area. A new Topographical Index, replacing the edition issued in the series of Reports on the 1926 Census, was published in January, 1963.

This Report is the second of seven county volumes to be published on the 1961 Census. The statistics therein supersede those in the Preliminary Report and may be accepted as final. It is generally consistent in design and scope with the Report already published for Belfast County Borough, and the remaining county volumes will be in similar form. Although details of population and habitable buildings in respect of townlands in rural districts are not given in the county volumes, the figures, for which a charge may be made depending on the extent of the information required, are available on application to the General Register Office.

A General Report will follow the county volumes. It will summarize for the whole country the information in the county volumes and, in some respects, deal with it in greater detail. The General Report will also contain certain additional information, including that on persons with scientific and technological qualifications, which has not been analysed on a county basis. There will be a separate Report on the Fertility of Marriage.

General Register Office, Fermanagh House, Ormeau Avenue, Belfast, 2.

November, 1963.

PART I

EXPLANATORY NOTES AND DEFINITIONS OF TERMS USED IN THE REPORT

AREA

The acreages given are as measured by the Ordnance Survey and relate to the County and its administrative and other areas as constituted at the date of the 1961 Census. Foreshore is excluded. Acreages of areas covered by the larger rivers, lakes and tideways are also excluded from the body of Tables 4 and 5, but the total is given in a footnote thereto.

POPULATION

The 1961 Census population comprises all living persons, irrespective of their usual address or nationality, who spent Census night in the area of enumeration. Members of the Armed Forces (including those of Commonwealth and foreign countries except personnel aboard foreign naval vessels) are included. Persons travelling on Census night were enumerated with the population of the district in which they arrived the next day unless they had already been enumerated elsewhere. Persons on vessels at moorings or anchorage in Northern Ireland waters or aboard ships on coastwise voyage to Northern Ireland ports were counted as part of the population of the district containing the mooring, anchorage or arrival port.

Population figures for the 1951 Census are adjusted to relate to areas as constituted at the date of the 1961 Census. Figures for earlier Censuses relate, generally, to areas as constituted at the respective Census dates.

ADMINISTRATIVE DIVISIONS

The County is divided into sixteen administrative areas - three municipal boroughs, seven urban districts and six rural districts. The municipal boroughs and three of the urban districts are divided into wards which form the territorial units for local council elections; in each of the remaining four urban districts, the entire district is the unit for municipal elections. In rural districts, the units are the district electoral divisions of which there are 116. The County is also divided into twenty-three county electoral divisions which are the units for county council election purposes.

There are seven parliamentary constituencies for elections to the Northern Ireland Parliament, and two constituencies for elections to the United Kingdom Parliament.

The following changes, affecting Census statistics, took place in the constitution or boundaries of administrative areas during the intercensal period:-

- (i) A portion of Lisburn Rural District was transferred to Lisburn Urban District (1st April, 1955).
- (ii) A portion of Larne Rural District was transferred to Larne Municipal Borough (1st April, 1956).
- (iii) Belfast Rural District was abolished and a portion became the Urban District of Newtownabbey; the remainder was transferred to the Rural Districts of Antrim, Larne and Lisburn (1st April, 1958).

BUILDINGS FOR HABITATION

For enumeration record purposes, a building was broadly defined as a structure comprising one or more rooms or other spaces enclosed within external or party walls.

(96843A)

A structure detached from but subsidiary to a main building was regarded as part of the main building unless it contained residential accommodation normally occupied by a separate household. Non-permanent structures such as huts, shacks and converted railway carriages and mobile structures such as tents and caravans were treated as buildings only if they were occupied on Census night or were some person's usual residence. Unoccupied structures of wood, asbestos, corrugated iron, etc., used as casual residences, e.g. at week-ends or holiday times, were regarded as buildings if they appeared to be of sound construction and had amenities such as piped water, sewerage facilities and electric lighting.

Dilapidated structures which were unoccupied and unlikely to be used again were ignored. Buildings in course of erection were listed only if some part thereof was in use as residential accommodation.

Buildings for habitation comprise all buildings used wholly or partly as residential accommodation. They are divided into two categories:-

(i) Private dwellings consisting of structurally separate units of living accommodation occupied or normally occupied by private households. They include houses, flats, non-permanent and mobile structures, and accommodation in buildings which are not wholly residential. Married quarters in Service establishments are also included.

A building is regarded as <u>not wholly residential</u> if part of it is used exclusively or primarily for purposes other than living accommodation, for example, a factory or block of offices containing a director's or caretaker's flat, or a building comprising a shop and dwelling. Buildings such as a doctor's or dentist's house with a room or annexe used as a surgery and a house containing a clergyman's or author's study are, however, treated as wholly residential.

(ii) Other buildings such as hotels, hostels, boarding houses, hospitals, welfare centres, religious community premises, boarding schools and other premises which exist for a specific functional purpose in addition to providing residential accommodation. Civilian shipping and establishments under Naval, Army and Air Force discipline are included.

The term <u>boarding house</u> covers buildings described as such in the Census returns and any buildings returned as private dwellings but containing five or more boarders. At the 1951 Census, private dwellings in which three or more boarders were enumerated were classified as boarding houses.

The term <u>inhabited</u> denotes actual residence of a person or persons on Census night. <u>Uninhabited</u> buildings therefore include not only those which were vacant on Census night but also those from which the usual occupants were temporarily absent. Permanent habitation means normal occupation all the year round.

TYPES OF PRIVATE DWELLINGS

Inhabited private dwellings are classified on the basis of instructions issued to the Census enumerators and which are summarised as follows:-

- (i) A dwelling house means a dwelling of permanent construction which is not divided into flats and is not a farmhouse. A prefabricated bungalow provided by a local authority is included.
- (ii) A flat means a completely self-contained dwelling on one or more floors with a separate entrance from the street or from a common landing or staircase. It must be possible to move between its rooms internally, without using a common landing or staircase used by other households. Also, none of the household arrangements (see notes on page viii) must be shared with the occupants of another unit of dwelling accommodation in the building. Where a building has been converted for the use of two or more households, the accommodation of any part is not regarded as a flat unless each part occupied by a householder has a main door giving access to the whole of the accommodation and unless the other conditions specified above are satisfied.

v11

- (iii) A farmhouse means a dwelling of permanent construction from which the occupier carries on farming as a main occupation. In practice, a dwelling described as a farmhouse on the Census return was classified as such only if at least one member of the household was engaged in farming.
 - (iv) Some other type of dwelling means a tent, caravan or other movable dwelling, or such structure as a barn, out-office, hut or shed of wood, corrugated iron or similar non-traditional material and which, though fixed, is of such a temporary and insubstantial nature that it cannot be regarded as a permanent dwelling.

TENURE OF PRIVATE DWELLING ACCOMMODATION

When completing the Census returns, private householders were required to indicate, under the following headings, how they occupied their accommodation; the information is tabulated on the same basis:-

- (i) As owner-occupier, including purchase by mortgage.
- (ii) By renting from a local or public authority, including the Northern Ireland Housing Trust, the Sailors' and Soldiers' Land Trust, Housing Associations and Government Departments.
- (iii) By renting from another landlord, and whether rented furnished or unfurnished.
- (iv) In some other way: this category covers accommodation which is neither owned nor rented by the household, for example, a house or flat occupied free of rent by virtue of the particular employment of the head or other member of the household.

In Table 6, a dwelling shared by two or more households is classified according to the tenure stated by the main household, the latter being identified on the basis of a graded list of tenures, owner occupied taking precedence over rented and rented/unfurnished taking precedence over rented/furnished.

HOUSEHOLDS

A household is a person living alone, or a group of persons living together and normally partaking of meals together whether in a dwelling or part thereof or in a hotel, boarding house, hospital, Service establishment or other premises in which some form of residential accommodation is provided. A private household is a household occupying all or part of a dwelling house, flat, farmhouse or other type of dwelling. A person (or persons) living in the same dwelling as, but not boarding with, the household is treated as a separate private household; but if the person usually has at least one meal per day provided by the household he is regarded as part of the household.

HOUSEHOLD ARRANGEMENTS

The arrangements on which information was collected in respect of each private household are listed below. The householder was required to state whether individual arrangements were used only by the household, shared with another household or were not available.

- (i) Cold water tap refers to a tap within the building, excluding a tap in an open yard.
- (ii) Hot water tap means water piped to a boiler, a tank with immersion heater, geyser, sink heater, or any form of heating appliance which will allow hot water to be drawn from a tap within the building.
- (iii) <u>Fixed bath</u> means a bath permanently installed with a waste pipe leading outside the building. It is immaterial for this purpose whether there is water piped to it or whether the room where it is installed is used only as a bathroom.

- (iv) <u>Water closet</u> means any water closet, within or attached to the building or in the yard, emptying into a main sewer, septic tank or cesspool. It does not include a chemical closet or earth closet.
- (v) <u>Kitchen sink</u> means a sink inside the building, whether in a kitchen or not, with a drain pipe leading outside the building, and normally used for washing up. It need not have water piped into it. A wash basin used primarily for personal toilet is excluded.
- (vi) Cooking stove or range means any cooking stove, kitchen range or other fixed grate using gas, electricity or any other fuel, provided there is an oven. It does not apply where the only method of cooking is by gas-ring, hotplate, portable electric or oil oven or by open fire.

ROOMS

The <u>rooms</u> counted are those normally used by the household for living, eating or sleeping purposes. A kitchen if so used is included, but not a scullery which is used only for washing, cleaning or cooking. A pantry, cloakroom, landing, lobby, closet or bathroom, or any warehouse, office, shop or other room used for non-domestic purposes is also excluded.

In the tables classifying households by rooms occupied, any room shared by two or more households in the same dwelling is allocated wholly to one (usually the main) household, ensuring however that the total number of rooms in the dwelling is not altered.

VALUATION

The figures shown in Tables 4 and 5 relate to the rating year 1961/62 and have been supplied by the Commissioner of Valuation. They are the totals of the valuations in the various areas before reduction on account of derating, but exclude in certain cases the valuations of such miscellaneous items as electricity, gas, trolley bus and water undertakings, telegraphs, telephones and fisheries. The total of the excluded valuations is given in a footnote to the tables.

Subject to the Local Government (Rating and Finance) Act (Northern Ireland), 1929, as amended by subsequent legislation, agricultural land and buildings are exempt from all ordinary rates, while industrial and freight-transport hereditaments and salmon and eel fisheries are partially derated. The consequent deficiency in the yield of rates is made good by way of General Exchequer contributions.

USUAL ADDRESS

The persons regarded as having their <u>usual addresses</u> in the area of enumeration include:-

- (i) Persons enumerated in their own homes, and those enumerated in and having a settled residence in private lodgings, boarding houses and hotels.
- (ii) Resident domestic staff enumerated at their places of work.
- (iii) Persons enumerated in and who were inmates of homes for old people, homes for terminal care, homes for handicapped persons and homes for persons requiring special care.
 - (iv) Persons enumerated in chronic sick or psychiatric hospitals and who had been patients or inmates for six months or more.
 - (v) Crews enumerated on vessels and usually living aboard ship, except crews of vessels registered in ports outside the United Kingdom.
 - (vi) Persons with no fixed addresses and persons for whom usual addresses were not stated and which could not be assumed from the Census returns.

School children and students living away from home during term time were required to give their home addresses on the Census return. Members of H.M. Forces not enumerated on the special Forces return had to give the addresses of their married quarters or other home addresses.

In addition to giving their usual addresses on Census day, persons born outside the British Isles were also required to state their <u>usual addresses a year</u> ago, i.e. at 23rd April, 1960.

BIRTHPLACE

A person born in a country which at Census day had ceased to have a separate existence is regarded as born in the absorbing country, for example, birthplace stated as Estonia, Latvia or Ukraine is classified as U.S.S.R. If the birthplace of an individual was not stated on the Census return, the county or country of birth was assumed only where this could be done with reasonable certainty from other entries in the return.

NATIONALITY

A person born outside the British Isles had to state his nationality on the Census return. A person born in a British Colony was instructed to enter "British" on the return. A citizen of one of the following was instructed to write "British" or "Commonwealth citizen":- United Kingdom and Colonies, Canada (including Newfoundland), Australia, New Zealand, The Union of South Africa, India, Pakistan, Ghana, Ceylon, The Federation of Malaya, The Federation of Rhodesia and Nyasaland, The State of Singapore, Nigeria and Cyprus.

RELIGION

In this classification, religious professions which differ only or mainly in denominational terminology are generally grouped together, and figures for the group as a whole are shown under the name by which the group is officially or commonly known. Thus the heading Presbyterian includes United Presbyterian, Trinitarian and Church of Scotland. Church of Ireland is regarded as embracing both Anglican and Episcopalian except for persons so described who had a usual address in England; such persons are classified as Church of England. In keeping with the practice in the 1951 Census Reports, figures for Church of England and Episcopal Church of Scotland are merged with those for Church of Ireland in the body of the tables, but their totals are given in a footnote to Table 18.

TERMINAL EDUCATION AGE

At the 1951 Census, information was sought as to whether persons at educational establishments were attending full-time or part-time. In 1961, all persons aged 15 years and over, who at Census day had ceased to receive full-time education at school, college, university, etc., were required to state the age at which their full-time education ended. In this Report, such age is referred to as the terminal education age.

OCCUPATIONS AND INDUSTRIES

The economic activity information collected at the Census was in respect of persons aged 15 years and over, and related to the activity during the week ended 22nd April, 1961, i.e. the week preceding Census day. For a person in employment, particulars were required of his main gainful employment during the week, irrespective of whether he was following his usual occupation or of the hours actually worked; if not in employment or wholly retired at the end of the week, the reference was to his last full-time employment.

A fourfold classification was adopted in analysing the economic activity information, namely, by occupation, industry, employment status and economic position, each being independent of the others and dealing with a different aspect of a person's employment or former employment. The results are tabulated on the

basis of the revised occupational and industrial Classifications used for 1961 Census purposes in the rest of the United Kingdom, viz., the Classification of Occupations, 1960 (H.M.S.O. Price £1 7s. 6d. net) and the Standard Industrial Classification, 1958 (H.M.S.O. Price 2s. 6d. net). Compared with previous Classifications, considerable changes have been made in the new Classifications to help make them conform with the current organisation of industry and commerce and to bring them more into line with recommended international standard Classifications. A detailed comparison of the 1961 data with those of earlier Censuses is, therefore, necessarily limited.

As at the 1951 Census, the sole criterion for determining a person's occupation is the kind of work he performs. The nature of the factory, business or service in which he is employed has no bearing on his occupational classification except to the extent/ that it may enable the nature of his duties to be more clearly defined. Thus every joiner, whether employed in shipbuilding, the building industry or on routine maintenance work in a textile factory, is classified to the same occupational group. The only exception to the rule applies to labourers assigned to groups 181-188 where the allocation is on a strictly industrial basis. Similarly, the industry to which a person is classified is largely independent of his occupation and is determined by reference to the business or economic activity in, or for the purposes of, which his occupation is followed, regard being had only to the nature of the service or product to which his labour contributes. For classification purposes, the industrial unit used is the "establishment", which is normally the whole of the premises, such as a factory, transport undertaking or shop, at a particular address.

Brief definitions of certain terms in the Report are given below.

Occupied or economically active population: all persons in employment during the week preceding Census day, including those temporarily away from work because of holidays, sickness, strikes, etc.; also included are persons who were out of employment but expecting to work again and young persons who had left school and were seeking their first job.

Working population: the occupied or economically active population excluding persons out of work.

Large establishments: establishments, other than farms, employing 25 or more persons.

Small establishments: other establishments.

Economically inactive population: all persons aged 15 and over without paid occupations. Included are the following specified groups:-

Institution inmates: inmates of institutions who returned a former occupation and were not stated to be retired, but who were known or assumed to be withdrawn from employment for a period in excess of six months.

Retired persons: formerly occupied persons who ceased to be employed and did not expect to work again.

Students: persons above the age of compulsory education at educational establishments.

Housewives: with no other stated occupation.

SOCIAL CLASS AND SOCIO-ECONOMIC GROUPS

A convenient summary of economic activity information for social and medical purposes is provided by two further classifications, namely Social Class and Socioeconomic Group.

Social Class - Under this classification, the many occupational unit groups are arranged into the following five broad categories:-

- I. Professional, etc. occupations
- II. Intermediate occupations

- III. Skilled occupations
- IV. Partly skilled occupations
 - V. Unskilled occupations

To give a somewhat finer classification, social classes II, III and IV are divided into "manual", "non-manual" and "agricultural" sub-groups. Within this framework, social class I is wholly "non-manual", and social class V wholly "manual". Members of the Armed Forces and persons with inadequately described occupations are excluded from the classification.

Socio-economic Groups - The 13 socio-economic groups introduced in 1951 are replaced by 16 rather different groups, the allocation of persons to the groups being determined by a cross-classification of occupation and employment status. The socio-economic groups, with brief definitions, are as follows:-

- (1) Employers and managers in central and local government, industry, commerce, etc. large establishments
- (2) Employers and managers in industry, commerce, etc. small establishments
- (3) Professional workers self employed

Self employed persons engaged in work normally requiring qualifications of university degree standard.

(4) Professional workers - employees

Employees engaged in work normally requiring qualifications of university degree standard.

(5) Intermediate non-manual workers

Employees, not exercising general planning or supervisory powers, engaged in non-manual occupations ancillary to the professions but not normally requiring qualifications of university degree standard; persons engaged in artistic work and not employing others thereat; and persons engaged in occupations otherwise included in Group (6) who have an additional and formal supervisory function.

(6) Junior non-manual workers

Employees, not exercising general planning or supervisory powers, engaged in clerical, sales and non-manual communications and security occupations, excluding those who have additional and formal supervisory functions.

(7) Personal service workers

Employees engaged in service occupations caring for food, drink, clothing and other personal needs.

(8) Foremen and supervisors - manual

Employees (other than managers) who formally and immediately supervise others engaged in manual occupations, whether or not themselves engaged in such occupations.

(9) Skilled manual workers

Employees engaged in manual occupations which require considerable and specific skills.

(10) Semi-skilled manual workers

Employees engaged in manual occupations which require slight but specific skills.

(11) Unskilled manual workers

Other employees engaged in manual occupations.

(12) Own account workers (other than professional)

Self employed persons engaged in any trade, personal service or manual occupation not normally requiring training of university degree standard and having no employees other than family workers.

(13) Farmers - employers and managers

Persons who own, rent or manage farms, market gardens or forests, employing people other than family workers in the work of the enterprise.

(14) Farmers - own account

Persons who own or rent farms, market gardens or forests and having no employees other than family workers.

(15) Agricultural workers

Employees engaged in tending crops, animals, game or forests, or operating agricultural or forestry machinery.

(16) Members of armed forces.

The detailed allocations of the occupation/employment status groups to the social classes and socio-economic groups are given in the Classification of Occupations, 1960.

CONVENTION AS TO DOTS (.) AND DASHES (-)

In the tables, a dot (.) indicates that figures are not available or that the column heading is not relevant to the particular line on which the dot is shown; a dash (-) indicates that the quantity is zero or, in the case of rates, less than half of the final digit.

COMPLETION AND REVISION OF CENSUS INFORMATION

When collecting the Census returns, the enumerators were required to examine them for obvious omissions and errors, asking such questions from the persons delivering the returns as seemed necessary to complete and correct them. Further scrutiny and revision of the returns took place at various stages of the work in the Census Office. In some cases, notably where ages had been omitted, enquiries were instituted; otherwise, information was inserted or amended only if reasonable assumptions could be made from other particulars on the returns. Prior to compilation, the data extracted from the returns were edited for impossible and unlikely combinations, corrections being made by reference back to the returns. Finally, the tabulations were checked for compatibility of related data.

PART II

STATISTICAL NOTES

The explanatory notes and definitions in Part I apply equally to the notes which follow and to the tables in Part III.

AREA

Excluding the larger rivers, lakes and tideways, the area of the County at Census day was 703,072 acres or 1,099 square miles. This represents 21 per cent of the area of Northern Ireland. In 1896 the County lost almost nine square miles to Belfast County Borough, but gained at later dates an aggregate of about half a square mile partly from County Down and partly from County Londonderry (see note to Table 2).

POPULATION

The total population of the County was 273,905, which is 42,756 persons or 18.5 per cent more than at the 1951 Census.

Table 2 shows the trends since 1821 when the first complete Census of Ireland was taken. Between that year and 1841, the population rose from 233,606 to 290,530 persons which is the highest yet recorded. Thereafter, there was a decline which continued with varying intensity until the 1926 Census, by which time the population had fallen to 191,643, i.e. a decrease of over one-third on the 1841 figure. A reversal of this trend in the intercensal period 1926-37 has since been accelerated by population increases of 17.2 and 18.5 per cent in the periods 1937-51 and 1951-61, respectively, with the result that the 1961 total for the County was the highest since the peak of 1841. In the recent Report for Belfast County Borough, it was pointed out that a marked decrease in population in the County Borough itself was accompanied by a correspondingly greater increase in the immediate environs of the City. In this connection, it may be noted that some 30 per cent of the 1961 population increase in County Antrim as a whole took place in the portion of the County adjoining the County Borough, viz., Newtownabbey Urban District and Lisburn Rural District.

Natural Increase: Figures of the natural increase, actual variation and net inward or outward movement of the population in each intercensal period since 1901 are given in Table I. Because certain registration districts formerly extended over parts of both Belfast County Borough and County Antrim, figures for the County are not available for periods prior to 1901.

TABLE I

| Intercensal period | Population at beginning of period | Births registered | Deaths registered | Excess of births over deaths | Intercensal variation in population | Net movement inward (+) outward (-) |
|-------------------------|---|----------------------|----------------------|------------------------------------|---|---|
| 1901-1911 (10 years) | 196,090 | 46,022 | 33,286 | 12 , 736 | - 2,226 | - 14,962 |
| 1911-1926 (15 years) | 193,864 | 62,824 | 46,543 | 16,281 | - 2,221 | - 18,502* |
| 1926-1937 (11 years) | 191,643 | 41,783 | 29,050 | 12,733 | + 5,623 | - 7,110 |
| 1937-1951 (14 years) | 197,266 | 60,995 | 37,257 | 23,738 | + 33,883 | + 10,145* |
| 1951-1961 (10 years) | 231,149 | 54,422 | 25,264 | 29,158 | + 42,756 | + 13,598 |

^{*}Including the deaths of non-civilians of the County of Antrim which occurred outside Northern Ireland. (96843A) xiv

The increase in population since 1937, particularly during the last intercensal period, reflects a relatively much greater natural increase (i.e. excess of births over deaths) than in the earlier part of the century and a net movement of persons into the County. To some extent these two factors are related, in that much of the post-war movement into the County undoubtedly consisted of growing families from Belfast County Borough which settled in the new houses in the vicinity of the City. As is seen from Table 3, in the ten years 1951-61 there was an aggregate net movement of close on 22,000 persons into Newtownabbey Urban District and Lisburn Rural District, compared with a net inward movement of 13,598 for the County as a whole. Excluding Newtownabbey, the remaining urban areas showed a total net inward movement of 2,182 persons. All rural districts except Lisburn had a net outward migration, amounting to 10,379 persons for the five districts concerned.

Administrative Areas: Table II shows the population by administrative areas since 1901 and the variations during the period 1951-61.

*As constituted at the date of the 1961 Census. /Estimated figure.

Following the trend at previous Censuses, all urban areas in the County returned increased populations during the period 1951-61. The greatest increase, actual and relative, was one of 17,233 persons or 85.2 per cent in the area which forms the new Urban District of Newtownabbey. Sizeable increases were also recorded in Larne Municipal Borough (+ 4,119 persons or 33.6 per cent), Carrickfergus Municipal Borough (+ 1,552 persons or 17.9 per cent) and Lisburn Urban District (+ 1,713 persons or 10.7 per cent).

In rural areas, the pattern since the turn of the century has been a decline in population in those areas remotest from Belfast, for example, decreases of 25 per cent in Ballycastle and Ballymena Rural Districts and, despite increases at both the 1951 and 1961 Censuses, a net decrease of some 9 per cent in Ballymoney Rural District during the sixty years covered by the Table. Antrim Rural District with a slight decrease since 1951 and Larne Rural District with an increase of 2.6 per cent have populations not very different from the 1901 figures. The population of Lisburn Rural District has grown rapidly since 1926 and, with an increase of 17,155 persons or 50.5 per cent in the last intercensal period, now stands at 51,127 which is the highest for any rural district in Northern Ireland.

Of the total population, 41.4 per cent were in the municipal boroughs and urban districts, compared with 28.5 per cent in such areas (excluding Newtownabbey) as existed at the 1951 Census. It should be noted, however, that some

administrative rural areas contain considerable portions which are virtually urban in character: for example, approximately 35,000 persons in Lisburn Rural District were enumerated in built-up localities extending from Belfast County Borough. If this is taken into account, it is estimated that close on 60 per cent of the County population in 1961 lived in urban communities.

Population densities in the administrative urban areas, in terms of persons per acre, averaged 6.67 and ranged from 12.09 in Ballymena to 2.57 in Ballyclare. In rural areas, the rates varied between 0.75 in Lisburn Rural District and 0.08 in Ballycastle Rural District.

Figures of population together with the numbers of habitable buildings and private households are given in Table 4 in respect of smaller territorial units, viz., wards of administrative urban areas, district electoral divisions of rural districts and towns with no legally defined boundaries.

Parliamentary Constituencies: The constituent divisions of the County for the purpose of elections to the Parliaments of both Northern Ireland and the United Kingdom are set out in Table 11 together with figures of population, the number of electors and the ratio of electors per 1,000 population in each constituency. For the County as a whole, the numbers of electors with residence qualifications for Northern Ireland and United Kingdom elections represented 99.4 per cent and 99.9 per cent, respectively, of the total population aged 21 years and over.

PRIVATE DWELLINGS AND HOUSEHOLDS

Total Dwellings: In 1961 there were 75,138 private dwellings of which 71,487 were inhabited and 3,651 were uninhabited. This represents an increase of 15,414 dwellings or 25.8 per cent on the corresponding 1951 total of 59,724 (inhabited 56,743; uninhabited 2,981). The intercensal variations are shown by administrative areas in Table IV.

Private dwellings 1951 1961 Intercensal variation Area+ In-Unin-In-Unin-In-Unin-Total Total Total habited habited habited habited habited habited 59,724 56,743 2,981 75,138 County 71,487 3,651 + 15,414 + 14,744 + 670 571 70 621 50 Ballycastle U.D. 641 685 64 44 6 1,039 1,251 Ballyclare n 1,019 20 1,214 37 212 195 17 Ballymena M.B. 3,302 3,234 68 3,875 3,769 106 573 + 535 + 38 Ballymoney 108 7 U.D. 809 39 956 924 32 + 115 848 2,944 2,760 + Carrickfergus M.B. 2,334 2,209 125 184 610 551 59 3,010 2,927 83 4,619 4,451 168 + 1,609 1,524 + 85 Lisburn U.D. 4,080 3,957 123 4,967 4,826 141 887 869 18 5,293 10,091 5,566 273 4,798 + 114 Newtownabbey 4,912 11 10,478 387 + 11 Portrush 1,067 955 112 1,246 1,114 132 179 + 159 20 Whitehead n 663 540 123 716 674 42 53 81 134 R.D. 6,991 6,769 222 7,584 7,214 370 593 445 + 148 Antrim 2,231 282 2,333 2.088 180 143 37 Ballycastle 245 11 2,513 ſf 261 8,255 238 80 Ballymena 8,278 8,017 8,596 341 318 5,046 4,822 Ballymoney n 224 5,597 5,290 307 + 551 +, 468 83 Ħ 763 5,548 663 262 362 - 100 5,949 5,186 6,211 Larne 8,204 193 13,080 12,648 432 4,683 4,444 + 239 Lisburn 8.397

TABLE IV*

*Table III, dealing with the environs of Belfast, appeared only in the Belfast County Borough volume. #As constituted at the date of the 1961 Census.

With the exception of Ballycastle Rural District, all administrative areas shared in the increased number of private dwellings. In the urban areas there was an aggregate increase of 9,187 dwellings or 40.7 per cent, with Newtownabbey Urban District (+ 4,912 dwellings or 88.3 per cent) and Larne Municipal Borough (+ 1,609 dwellings or 53.5 per cent) returning the largest individual increases.

Lisburn Rural District had an increase of 4,683 dwellings or 55.8 per cent more than in 1951; in the other rural districts, the intercensal changes in total dwellings ranged from an increase of 10.9 per cent in Ballymoney to a decrease of 7.2 per cent in Ballycastle.

Almost 5 per cent of the total dwellings in the County were uninhabited, which was the same proportion as in 1951. The highest proportions were in those districts which extend to the coastline: for example, 11.1 per cent in Larne Rural District, 10.6 per cent in Portrush Urban District, 10.5 per cent in Ballycastle Rural District, and 9.5 per cent in Ballycastle Urban District. In these areas many of the dwellings returned as uninhabited were, no doubt, casual or summer residences. It should also be noted that the total of 3,651 uninhabited dwellings included an unspecified number of homes from which the usual occupants were only temporarily away on Census night.

According to statistics furnished by the Ministry of Health and Local Government, approximately 20,300 new units of dwelling accommodation were provided in the County during the intercensal period. When this figure is compared with the Census increase of 15,400 in the total inhabited and uninhabited dwellings, it follows that some 4,900 dwellings recorded in 1951 either had ceased to exist by 1961 or were no longer used for private dwelling purposes.

Inhabited Dwellings: Table 6 shows, in respect of the County and each administrative area, the numbers of inhabited private dwellings, rooms and persons therein. Excluding information on type and tenure of accommodation which was collected for the first time in 1961 and which is dealt with in later paragraphs, summary figures for the County are given in Table V together with comparable figures at previous Censuses.

TABLE V

| | | 1926 | 1937 | 1951 | 1961 |
|----------------------------|-------------------|----------------|----------------|-----------------|----------------|
| Total inhabited dwellings | | 41,021 | 46,117 | 56,743 | 71,487 |

| 6 or more rooms | (No. (% | 10,741 26.2 | 11,448 24.8 | 13,377 23.6 | 14,221 19.9 |
| Total rooms | • | 186,666 | 212,709 | 264,405 | 334,193 |
| Population in private dwel | lings | 184,051 | 191,128 | 222,806 | 265,158 |
| Average no. of rooms per | lwell i ng | 4.55 | 4.61 | 4.66 | 4.67 |
| Average no. of persons per | dwelling | 4.49 | 4.14 | 3.93 | 3.71 |
| Average no. of persons per | room | 0.99 | 0.90 | 0.84 | 0.79 |

During the period 1951-61 the number of inhabited private dwellings increased at a proportionately greater rate than the population therein as follows:-+14,744 dwellings or 26.0 per cent; +42,352 persons or 19.0 per cent. average number of rooms per dwelling was also slightly greater than in 1951, there was, therefore, a reduction in the average numbers of persons per dwelling and per room, which continued the trend revealed at previous Censuses. At 3.71 persons per dwelling and 0.79 persons per room, the 1961 average densities were 17 per cent and 20 per cent, respectively, below the corresponding averages in 1926. Shared dwellings, i.e. those containing more than one household, also decreased significantly, representing 0.1 per cent of the total inhabited dwellings compared with 0.6 per cent in 1951 and 1.2 per cent in 1926. Dwellings with 4-5 rooms increased by 14,061 and now form some 63 per cent of the total as against 39 per cent in 1926; those with six or more rooms increased by 844. Although the number of 1-3 roomed dwellings decreased only marginally by 161, their proportion fell from 22 per cent to 17 per cent which was less than half of the 1926 ratio.

Table VI shows for each administrative area the percentages of inhabited dwellings by room categories, together with average population densities per dwelling and per room.

TABLE VI

| | Per | rcentage | of inhat | Average no. of | Average number of persons | | | | |
|--|--|---|--|--|---|--|--|--|--|
| Area | 1-2 rooms | 3 rooms | 4 rooms | 5 rooms | 6 rooms | 7 or more rooms | rooms per dwelling | Per dwelling | Per room |

| Antrim R.D. Ballycastle Ballymena Ballymoney Larne Usburn | 6.4 9.2 8.8 7.0 5.1 5.6 | 14.8 14.7 14.3 15.5 14.5 11.0 | 34.2 37.7 29.7 41.1 25.9 31.3 | 21.5 17.3 21.5 14.4 28.4 38.2 | 11.7 9.5 13.5 9.7 14.6 8.4 | 11.4 11.6 12.2 12.3 11.5 5.5 | 4.63 4.51 4.62 4.56 4.80 4.53 | 3.66 3.85 3.81 3.97 3.52 3.93 | 0.79 0.85 0.82 0.87 0.73 0.87 |

On the basis of overall averages for each type of area, the number of rooms per dwelling and the numbers of persons per dwelling and per room did not differ greatly as between urban and rural areas. The figures were:-

| | Average number of | | | | | |
|--------------|------------------------|--------------------|--|--|--|--|
| | Rooms | <u>Persons per</u> | | | | |
| | <u>per</u> dwelling | Dwelling Room | | | | |
| Urban areas | 4.77 | 3.58 0.75 | | | | |
| Rural areas | 4.60 | 3.80 0.83 | | | | |
| Total County | 4.67 | 3.71 0.79 | | | | |

Of the urban areas, Portrush (5.62), Whitehead (5.42) and Ballycastle (5.29) had the highest average numbers of rooms per dwelling; Carrickfergus Municipal Borough (4.45) and Lisburn Urban District (4.54) had the lowest averages. the number of persons per dwelling, the urban averages ranged from 3.11 in Whitehead and 3.26 in Portrush to 3.65 and 3.74 in Carrickfergus and Ballymena, respectively.

In the rural areas, Larne Rural District had both the highest average number of rooms per dwelling (4.80) and the lowest average number of persons per dwelling (3.52).

Type and Tenure of Inhabited Dwellings: Of the 71,319 inhabited permanent dwellings, 59,920 or 84.0 per cent were classified as dwelling houses. Of the latter, 37 per cent were owner occupied, 31 per cent were rented from local or public authorities and 29 per cent were rented unfurnished from other landlords. Those rented furnished from other landlords accounted for just under one per cent, the remaining two per cent being occupied in some other way.

At 3,589, the number of flats represented 5.0 per cent of the total inhabited permanent dwellings. Some 83 per cent were rented from local or public authorities, and 14.5 per cent were rented, mostly unfurnished, from other land-Farmhouses numbered 7,810 or 11.0 per cent of the total dwellings.

Table VII shows by administrative areas the percentages of inhabited dwelling houses and flats in each main tenure category, together with the number of farmhouses in each area.

TABLE VII

The proportion of owner occupied to total inhabited dwelling houses was highest in Portrush Urban District (50.0 per cent) and Lisburn Rural District (45.9 per cent); it was lowest in Carrickfergus Municipal Borough (21.1 per cent) and Ballymoney Rural District (23.1 per cent). The two last-named areas had the highest percentages of dwelling houses rented from local or public authorities, viz., 55.2 per cent in Ballymoney Rural District and 49.2 per cent in Carrickfergus. At the other extreme, in Portrush Urban District and Larne Rural District less than one in five dwelling houses was rented from local or public authorities. In the case of dwelling houses rented from other landlords, the proportions varied from 40.2 per cent in Lisburn Urban District and 38.0 per cent in Antrim Rural District to 20.4 per cent and 19.1 per cent in Ballycastle and Ballymoney Rural Districts, respectively.

The areas with the most significant numbers of flats were Newtownabbey Urban District (1,295) and Lisburn Rural District (718), which together accounted for 56 per cent of the total flats in the County. Almost three-quarters of the flats in Newtownabbey and 96 per cent of those in Lisburn Rural District were rented from local or public authorities. Of the 7,810 farmhouses in the County, 78 were situated in administrative urban areas. In the rural areas, the proportion of farmhouses to total permanent dwellings ranged from approximately one in three in Ballycastle Rural District to about one in five in Antrim and Larne and only one in seventeen in Lisburn Rural District.

The number of inhabited dwellings returned as non-permanent was 168, of which 158 were stated to be normally occupied all the year round. Their classification by tenure was:- owner occupied 108; rented from local or public authorities 0; rented from other landlords - furnished 6, unfurnished 36; occupied in some other way 18. An analysis by type and location of dwelling is given below.

| | | Caravans, tents and other mobile structures | $\frac{\text{Barns}}{\text{sheds}}$, etc. | Total |

| | | 90 | 78 | 168 |

Private Households: Table 7 details the numbers of private households in the County and each administrative area by household sizes, rooms occupied and densities of room occupation. There were 71,616 private households in 1961 or 14,449 more than at the previous Census. This represents an increase of 25.3 per cent, which may be contrasted with increases of 26.0 per cent in the number of inhabited private dwellings, 26.4 per cent in the number of rooms occupied and 19.0 per cent in the private household population. The average size of households was 3.70 persons, compared with 3.90 in 1951 and 4.42 in 1926.

Except for households consisting of 10 or more persons in which there was a minor decrease, the number of households in each size group was higher than in 1951. While the actual increases were greatest in the two-persons, three-persons and four-persons groups in that order, the one-person households showed the largest relative increase as follows:-

| Size of household | <u> 1951</u> | 1961 | Increase |
|-------------------|--------------|--------|------------|
| | No. | No. | No. % |
| One person | 4,995 | 7,135 | 2,140 42.8 |
| Two persons | 11,302 | 15,927 | 4,625 40.9 |
| Three " | 11,633 | 14,700 | 3,067 26.4 |
| Four " | 10,749 | 13,379 | 2,630 24.5 |

Expressed as percentages of the total households, the largest groups were: two-persons 22.2; three-persons 20.5 and four-persons 18.7. In 1951, the three-persons household (20.3) was the largest group, followed by two-persons (19.8) and four-persons (18.8). The percentage for the one-person group increased from 8.7 in 1951 to 10.0 in 1961.

The 1961 percentage distribution of private households by sizes is shown for each administrative area in Table VIII below.

TABLE VIII

| Area | Percentage of private households consisting of | | | | | | | | Average number of persons per household | |
|--------------------|--|--------------|--------------|--------------|--------------|--------------|------------------------------|-------|---|--|
| | 1 person | 2 persons | 3 persons | 4 persons | 5 persons | 6 persons | 7 or mor e persons | 1951* | 1961 | |
| County | 10.0 | 22.2 | 20.5 | 18.7 | 12.0 | 7.3 | 9.3 | 3.90 | 3.70 | |
| Ballycastle U.D. | 16.4 | 24.2 | 17.7 | 12.1 | 9.3 | 7.1 | 13.2 | 3.74 | 3.64 | |

| Ballymoney " | 10.4 | 19.8 | 18.9 | 16.8 | 12.4 | 8.2 | 13.5 | 4.20 | 3.97 | |
| Larne | 13.0 | 22.7 | 20.8 | 17.5 | 11.2 | 6.9 | 7.9 | 3.69 | 3.51 | |
| Lisburn " | 7.3 | 21.2 | 19.5 | 19.6 | 13.0 | 8.0 | 11.4 | 3.76 | 3.92 | |

^{*}Figures relate to areas as existing at the 1951 Census.

The average size of private households in administrative urban areas was 3.58 persons, compared with 3.80 in rural areas and 3.70 for the County as a whole. In individual areas, the averages ranged from 3.11 in Whitehead and 3.23 in Portrush Urban Districts to 3.92 and 3.97 in Lisburn and Ballymoney Rural Districts, respectively. All areas, except Lisburn Rural District where the average rose from 3.76 to 3.92, showed lower average sizes of households than in 1951.

Rooms and Density of Occupation: Decreases occurred in the proportion of households in each room category up to four rooms as follows:-

Percentage of households occupying

| | <u>l room</u> | 2 rooms | 3 rooms | 4 rooms |
|------|---------------|---------|---------|---------|
| 1951 | 0.8 | 7.5 | 14.4 | 31.0 |
| 1961 | 0.5 | 4.6 | 12.5 | 30.6 |

In 1951, households occupying four rooms formed the largest group whereas households with five rooms, which increased numerically from 13,206 to 23,048 and proportionately from 23.1 per cent to 32.2 per cent, were the largest group in 1961. The percentage for households having six or more rooms fell from 23.2 to 19.8. At the 1951 Census, households of four persons occupying four rooms were in the majority, followed by households of three persons occupying four rooms. By 1961, households of four persons occupying five rooms had become the most frequent, with two-persons households in four rooms in second place.

Table IX shows for each administrative area the 1961 relative distribution of households by rooms occupied, together with the percentages of households and population living at a density of over two persons per room. (Such a density has been chosen to provide a convenient comparison with information published at previous Censuses and not as a measure or definition of overcrowding. Data for a limited sub-division of a density of two or less persons per room are given in Table 7; figures for almost any required density can be arrived at from the details in the As only 0.3 per cent of the total households shared accommodation with other households, the distribution of households by rooms occupied was virtually the same as that of private dwellings by rooms therein. Such distribution varied considerably as between one area and another; and it will be seen that the proportion of households occupying less than four rooms was generally much higher in rural than in urban areas, ranging in individual cases from almost one in four in Ballycastle and Ballymena Rural districts to less than one in ten in Ballyclare Urban District and Ballymena and Larne Municipal Boroughs.

TABLE IX

| | Pei | rcentage | of pri occupy | | usehold | Percentage of private households | Percentage of private household population at density of over | | |

| Ballymena " | 9.1 | 14.4 | 29.6 | 21.5 | 20.2 | 5.2 | 3.5 | 14.2 | 7.6 |
| Ballymoney " | 6.9 | 15.5 | 41.1 | 14.4 | 15.7 | 6.4 | 4.8 | 13.1 | 11.0 |
| Larne " | 5.3 | 14.6 | 25.8 | 28.4 | 20.4 | 5.5 | 1.6 | 6.3 | 3.8 |
| Lisburn " | 5.7 | 11.0 | 31.3 | 38.1 | 11.9 | 2.0 | 2.8 | 7.7 | 6.5 |

^{*}Figures relate to areas as existing at the 1951 Census.

Households in the County accommodated at a density of over two persons per room numbered 1,754 or 2.4 per cent of the total households, compared with 6.1 per cent in 1951 and 10.7 per cent in 1926. Except in Larne Rural District, the 1961 proportion of households at over two persons per room in each rural district was above the County average and greater than that for any of the urban areas.

Households at a density of $1\frac{1}{2}$ -2 persons inclusive per room accounted for 8.8 per cent of the total households; those at one and over but under $1\frac{1}{2}$ persons per room represented 26.5 per cent. Households returning an average density of less than one person per room formed 62.3 per cent of the total, as against 55.8 per cent in 1951.

The number of persons residing at over two per room constituted 5.8 per cent of the total private household population, compared with 9.0 per cent in 1951 and 18.4 per cent in 1926. Omitting Newtownabbey Urban District for which comparable 1951 information is not available, a decrease was recorded in the proportion for each administrative area except Ballycastle Rural District where the percentage of the population living at over two persons per room increased from 12.8 to 14.2, the latter being the highest for any area. The only other area in which the average proportion of persons living at over two per room exceeded ten out of every hundred persons was Ballymoney Rural District where the percentage was 11.0; there were five such areas in 1951, viz. Ballycastle Urban District and Antrim and Ballymena Rural Districts in addition to Ballycastle and Ballymoney Rural Districts.

Persons living at densities of $1\frac{1}{2}$ -2 persons and one and over but under $1\frac{1}{2}$ persons per room represented 15.4 per cent and 33.6 per cent, respectively, of the total private household population. In the under one person per room category, the percentage for the County was 45.2; the corresponding percentages for individual areas ranged from 68.1 in Whitehead and 63.8 in Portrush Urban Districts to 37.0 in Ballymoney Rural District and 36.8 in Ballycastle Rural District.

The number of households with three or more persons living in a single room decreased during the last intercensal period from 119 to 49; of the latter, 12 were in urban and 37 in rural areas.

Household Arrangements: Table 8 shows, in respect of the arrangements on which information was sought in the Census return, the extent to which private households had access to such arrangements in their dwellings and whether they had exclusive use of the arrangements or shared them with other households. The information is analysed according to the number of households per dwelling and the tenure and type of accommodation occupied.

In the County as a whole, 41,599 households or 58.1 per cent had sole use of all six arrangements and a further 47 households or 0.1 per cent shared all arrangements with other households. Households without any of the arrangements numbered 3,056 or 4.3 per cent of the total households. Of the households with none of the arrangements, some 40 per cent were in owner-occupied accommodation and a further 44 per cent rented their accommodation unfurnished from private landlords; approximately three-quarters occupied dwelling houses and one-fifth occupied farmhouses. The arrangements available most were a fixed cooking stove or range (available to 90.2 per cent of all households), a kitchen sink (84.4 per cent), a cold water tap (80.5 per cent) and a water closet (76.7 per cent). Those possessed by fewest households were a hot water tap and a fixed bath; 25,805 households or 36.0 per cent had no hot water tap and 27,871 or 38.9 per cent lacked a fixed bath.

Table X shows the numbers of households, expressed as percentages of the total households, which had use (sole or shared) of the various arrangements according to the tenure and type of accommodation occupied. Households in accommodation provided by local or public authorities had relatively the greatest availability of arrangements; for example 75.8 per cent of such households had use of all six arrangements compared with 62.5 per cent for households in owner-occupied accommodation and an average of 58.2 per cent for all households. The proportion of households with all or any of the arrangements, particularly hot water taps and fixed baths, was lowest in the case of households in accommodation rented unfurnished from private landlords. As regards the availability of arrangements according to the type of accommodation occupied, households in flats generally fared better than those in dwelling houses; the latter, in turn, had a much greater availability of arrangements than households occupying farmhouses.

Table XI compares on a percentage basis the extent to which households had sole or shared use of the arrangements in the various administrative areas of the County.

As expected, households in urban areas had generally a much greater availability of arrangements than those in rural areas. The proportions for households with all arrangements varied from 88.4 per cent in Whitehead and 86.8 per cent in Newtownabbey Urban Districts to about one-third for households in Ballycastle, Ballymena and Ballymoney Rural Districts. In Lisburn Rural District, of which a considerable portion is more urban than rural in character, the proportion of households with all arrangements was as high as the average for all administrative urban areas. Except in Ballycastle, Ballyclare and Ballymoney Urban Districts, over 97 per cent of the households in urban areas had a cold water tap or water closet or both; in Ballycastle Rural District the corresponding proportions were:- cold water tap 48.9 per cent and water closet 40.4 per cent, which were the lowest for any area. The percentages for households with a hot water tap or fixed bath varied widely, not only as between urban and rural areas but from one area to another in the same category.

Household Socio-economic Groups: Table 9 analyses, by the socio-economic group of the head of household, the numbers of private households and persons therein according to the tenure of the accommodation and the number of rooms occupied by the household. Except for that relating to rooms, the information is summarised in Table XII to provide a convenient comparison between the main groups. A brief definition of each socio-economic group is given in Part I of the Report.

| | | Number | Population | Average | | Proportion in each ten | | |
|------|---|-----------------------------|-----------------------------|--|--------------------|---|--------------------------------------|-------------------------------------|
| So | cio-economic group | of private households | in private households | number of persons per household | Owner- occupied | Rented from local or public authority | Rented from other landlords | Occupied in some other way |

| 11 | Unskilled manual workers | 7,535 | 31,247 | 4.15 | 17.0 | 44.9 | 37.2 | 0.9 |
| 12 | Own account workers (other than professional) | 2,758 | 10,216 | 3.70 | 57.1 | 16.2 | 25.4 | 1.3 |
| 1.3 | Farmers-employers and managers | 1,759 | 7,378 | 4.19 | 94.3 | 1.4 | 2.5 | 1.8 |
| 14 | Farmers-own account | 6,920 | 26,461 | 3.82 | 93.4 | 1.3 | 4.0 | 1.3 |
| 15 | Agricultural workers | 2,113 | 8,452 | 4.00 | 17.0 | 35.7 | 39.2 | 8.1 |
| 16 | Members of armed forces | 448 | 1,685 | 3.76 | 8.5 | 71.0 | 17.2 | 3.3 |
| | Indefinite and not applicable | 8,580 | 24,148 | 2.81 | 41.8 | 25.3 | 30.9 | 2.0 |
| | Total | 71,616 | 265,158 | 3.70 | 41.8 | 30.1 | 25.9 | 2.2 |

Approximately 94 per cent of the heads of households who were farmers (S.E.G's 13 and 14) and 70 per cent of employers and managers (S.E.G's 1 and 2) owned their accommodation, compared with slightly more than 20 per cent for personal service workers (S.E.G. 7) and semi-skilled manual workers (S.E.G. 10) and 17 per cent for unskilled manual workers (S.E.G. 11) and agricultural workers (S.E.G. 15).

Householders in accommodation rented from local or public authorities accounted for less than 1.5 per cent of those in the farmers' group, 8.7 per cent of professional workers (S.E.G's 3 and 4) and 10.7 per cent of employers and managers. Excluding S.E.G. 16, the proportion was highest at some 45 per cent in the case of manual workers classified to S.E.G's 9-11. In the category of householders who rented their accommodation from other landlords, the proportions ranged from 39.2 per cent for agricultural workers to 17.5 per cent for professional workers and an average of under four per cent for farmers in S.E.G's 13 and 14.

Households in accommodation occupied in some other way represented only 2.2 per cent of the total households. The proportion for each socio-economic group was also small except in the professional workers' group where it reached 14.4 per cent and the agricultural workers' group with 8.1 per cent. A probable reason for the former is that the professional workers' group includes clergymen, many of whom occupied rent-free accommodation provided by the church authorities; similarly, the agricultural workers' group no doubt contains relatively more householders who, by virtue of their employment, lived in rent-free dwellings than those in the remaining groups.

Table XII also compares the average sizes of households by socio-economic groups. Against an average of 3.70 persons for all households, the highest averages were 4.19 for households in the group consisting of farmers who were employers and managers (S.E.G. 13) and 4.15 for those in the unskilled manual workers' group. Households in the groups of manual foremen and supervisors (S.E.G. 8), skilled manual workers and agricultural workers averaged four persons each. The lowest averages were 2.87 persons for households of which the heads were personal service workers (S.E.G. 7) and 3.87 for those in the intermediate and junior non-manual workers' group (S.E.G's 5 and 6). With regard to households in the residual category of "Indefinite and not applicable", it is pointed out that such households include those of which the heads had no occupation other than that of housewife and who were accordingly excluded from the socio-economic classification; in many cases the household heads were either widows or married women whose husbands were away on Census night.

Calculations based on the data in Table 9 enable a general comparison to be made of the average sizes of households by tenure of the accommodation occupied as follows:-

| Tenure | Average size of household |
|---|---------------------------|
| Owner-occupied | 3.56 persons |
| Rented from local or public authorities | 4.25 " |
| Rented from other landlords | 3.31 " |
| Occupied in some other way | 3.45 " |

It will be seen that the average size of households in accommodation rented from local or public authorities was appreciably greater than that of households in the other main tenure categories.

USUAL ADDRESS

Table 12 discloses that 98.7 per cent of the enumerated population had usual addresses in the County. Of the remainder, 2,410 persons or 0.9 per cent of the total enumerated population normally lived elsewhere in Northern Ireland, and 1,215 persons or 0.4 per cent were usually resident outside Northern Ireland.

SEX, AGE AND MARITAL CONDITION

The population of the County was distributed by sex, age and marital condition as shown in Table 13. Summaries for each administrative area are given in Table 14. Table XIII below compares the position, on an age group basis, with that at the 1951 Census.

Males

Sex Distribution: In 1961 there were 1,051 females to every 1,000 males compared with 1,060 in 1951. Males exceeded females at all ages up to and including 15 years. At each age from 16 to 39 years, females were in the majority and, with a few minor exceptions, continued to predominate thereafter, the relative disparity being more pronounced at the higher ages. In the combined groups aged 70 and over, there were approximately ten women to every seven men.

Ages: Compared with the figures at the previous Census, the number of persons in each quinquennial age group increased, although there was a small decrease in females aged 20-24 years and a 3.5 per cent reduction in males in the combined groups 70-79 years. More than half of the total increase of 42,756 persons was among young persons under 20 years of age, particularly in the group aged 10-14 where the number increased by 40.9 per cent on the 1951 figure. At other ages, the increases were relatively greatest from 80 years onwards and at ages 45 to 64; they were lowest in the groups 20-29 and 70-79 years in which the percentage increases were only 2.3 and 4.5, respectively, against an increase of 18.5 per cent for all ages.

Three persons, all widows, were returned as aged 100 and over, compared with one spinster and two widows at the 1951 Census.

The changed pattern of the percentage distribution of the population by four broad age groups since 1901 is indicated below.

| | <u>1901</u> | <u> 1911</u> | <u> 1926</u> | <u> 1937</u> | <u> 1951</u> | <u> 1961</u> |
|-------------|-------------|--------------|--------------|--------------|--------------|--------------|
| 0-14 years | 31.5 | 30.8 | 29.2 | 26.6 | 27.3 | 29.6 |
| 15-44 " | 44.4 | 43.3 | 42.9 | 44.5 | 43.2 | 40.8 |
| 45-64 " | 16.7 | 16.3 | 18.8 | 19.0 | 19.5 | 20.3 |
| 65 and over | 7.4 | 9.6 | 9.1 | 9.9 | 10.0 | 9.3 |

Marital Condition: Although there was an intercensal increase of 23,671 persons or 14.4 per cent in the population aged 16 years (the statutory minimum age of marriage) and over, single persons of that age group were fewer by 1931 (798 males and 1,133 females) or 3.1 per cent. The number of married persons rose by 24,384 (12,209 males and 12,175 females) or 27.4 per cent, increases in both married men and women having occurred at all ages up to 69 years and at most ages thereafter. The number of widowers decreased by 275 whilst widows increased by 1,489. Of divorced persons who had not remarried, males increased from 57 to 86 and females from 141 to 206.

The following statement shows the percentage distribution of the population aged 16 and over by sex and marital condition at the last three Censuses.

| | | <u> 1937</u> | | 951 | <u> 1961</u> | | |
|----------|--------------|----------------|--------------|----------------|--------------|----------------|--|
| | <u>Males</u> | <u>Females</u> | <u>Males</u> | <u>Females</u> | <u>Males</u> | <u>Females</u> | |

| Married | 47.7 | 44.6 | 56.0 | 52.5 | 62.6 | 58.1 | |
| Widowed | 5.6 | 10.7 | 4.7 | 10.6 | 3.8 | 10.8 | |
| Divorced | 0.0 | 0.0 | 0.1 | 0.2 | 0.1 | 0.2 | |

BIRTHPLACE AND NATIONALITY

Table 15 shows the population of the County by sex and place of birth. Of the total with stated place of birth, 61.6 per cent were born in the County, 21.0 per cent in Belfast County Borough and a further 9.4 per cent in the rest of Northern Ireland. The percentages for persons born in the Irish Republic and Great Britain (including the Isle of Man and Channel Islands) were 2.5 and 4.7 respectively. Less than one per cent were returned as born outside the British Isles. In 1951, the proportion of the population born in Belfast County Borough was 13.1 per cent; the increase to 21.0 per cent in 1961 is another pointer to the substantial movement of persons from the City to the County during the intercensal period, already referred to in this Report.

Changes in the general pattern at each Census since 1861 are outlined in Table XIV.

TABLE XIV

| Census | | Percentages born in | | | | | | | | | |

*Persons born in the Isle of Man (39 in 1961) and the Channel Islands (13) are included under this heading.

Table 16 gives the number of persons born outside Northern Ireland by sex, place of birth and main religious groups. The figures are summarised and shown on a percentage basis in Table XV.

| Birthplace | | Roman Catholic | Presbyterian | Church of Ireland | Methodist | Other and not stated denominations | Total |
|---|-----------------|-------------------|---------------|----------------------|------------|--|-----------------|
| Great Britain (including Isle of Man and Channel Islands) | (No. ((% | 2,168 / 17.1 | 3,530 27.8 | 4,891 38.5 | 758 6.0 | 1,345 10.6 | 12,692 100.0 |
| Irish Republic | (No. | 2,669 39.6 | 1,369 20.3 | 2,058 30.5 | 252 3.7 | 396 5.9 | 6,744 100.0 |
| Other countries | (No. | 463 | 665 | 505 | 80 | 357 | 2,070 |
| (including at sea) | (% | 22.4 | 32.1 | 24.4 | 3.9 | 17.2 | 100.0 |
| Total born outside | (No. | 5,300 | 5,564 | 7,454 | 1,090 | 2,098 | 21,506 |
| Northern Ireland | (% | 24.6 | 25.9 | 34.7 | 5.1 | 9.7 | 100.0 |
| Total population | (No. | 66,929 | 112,194 | 61,454 | 12,040 | 21,288 | 273,905 |
| | (% | 24.4 | 41.0 | 22.4 | 4.4 | 7.8 | 100.0 |

Among persons born outside Northern Ireland, the proportion of Roman Catholics was virtually the same as the proportion of Roman Catholics in the total population of the County, whereas the proportion of Presbyterians was much lower, and that of members of the Church of Ireland much higher than the corresponding proportions of the total population.

Table 17 analyses the number of persons born outside the British Isles by sex and usual address on 23rd April, 1960, distinguishing between British or Commonwealth citizens and persons of alien nationality. Of the 2,070 persons with birthplaces outside the British Isles, 86.8 per cent were British or Commonwealth citizens, 11.4 per cent were aliens and the remaining 1.8 per cent omitted to answer the nationality question.

RELIGION

Table 18 shows the population by sex for each administrative area under four main religious headings, viz., Roman Catholic, Presbyterian, Church of Ireland and Methodist, and a fifth group embracing all other and not stated denominations. Totals for each denomination in the last-named category with 10 or more adherents are given in a footnote to the Table. Changes in the position in the County as a whole since 1861 are set out in Table XVI below.

TABLE XVI

| Census | Total | Ron Catl | nan nolic | Presby | terian/ | Church of Ireland* | | Methodist | | Other and not stated denominations | |
|--|--|--|--|--|--|--|--|---|--|--|--|

*Including Church of England and Episcopal Church of Scotland numbering 2,849 and 10, respectively, in 1961.

In relation to the total population, Roman Catholics accounted for 24.4 per cent which is the highest ratio at any Census during the past hundred years. While Presbyterians still formed by far the largest single denomination, their proportion fell from 44.9 per cent in 1951 to 41.0 per cent in 1961 in continuance of the downward trend revealed at each Census since 1861 when the percentage stood at 53.4. The percentage for Church of Ireland was 22.4 compared with 22.8 in 1951 and 1937 and 22.5 in 1926. At 4.4, the percentage for Methodists showed a small increase on the 1951 ratio; the proportion for the other and not stated denominations rose from 6.4 to 7.8 per cent. However, with most if not all denominations, comparison with earlier years is slightly vitiated by the increase from 1,083 to 5,086 in the number of persons who did not state a religious profession - an increase which probably reflects a much greater awareness in 1961 that it was not obligatory to answer the Census question on religion.

Table 19 shows the numbers of males and females in each of the main denominations by individual years of age to 21 and by quinquennial groups from 20 years onwards. Between 1951 and 1961, the number of persons returned as Roman Catholics under 10 years of age increased by 48.9 per cent while that for all others in the same age group increased by 13.9 per cent; in the range 10 to 21 years, respective increases of 47.4 per cent and 21.3 per cent were recorded. At ages over 21, the proportionate increases were less disparate, being 17.9 per cent for Roman Catholics and 13.4 per cent for all others.

The percentages of persons by religions in certain age groups to the total population in those groups, with comparable figures for 1951, are given in Table XVII.

TABLE XVII

| Age | | Roman Catholic | | Presbyterian | | Church of Ireland | | dist | Other and not stated | |
|-------------------|------|-------------------|------|--------------|------|----------------------|------|------|----------------------|------|
| group | 1951 | 1961 | 1951 | 1961 | 1951 | 1961 | 1951 | 1961 | 1951 | 1961 |
| All ages | 22.1 | 24.4 | 44.9 | 41.0 | 22.8 | 22.4 | 3.8 | 4.4 | 6.4 | 7.8 |
| Under 1 year | 29.3 | 32.7 | 38.9 | 34.3 | 22.8 | 20.9 | 3.9 | 4.5 | 5.1 | 7.6 |
| Under 10 years | 27.0 | 32.6 | 40.7 | 34.7 | 22.7 | 21.2 | 3.8 | 4.2 | 5.8 | 7.3 |
| Under 25 years | 25.2 | 29.4 | 42.3 | 37.1 | 22.9 | 21.9 | 3.6 | 4.2 | 6.0 | 7.4 |
| 25-49 years | 20.5 | 22.3 | 45.3 | 41.8 | 23.4 | 23.0 | 4.2 | 4.8 | 6.6 | 8.1 |
| 50 years and over | 18.8 | 18.1 | 48.9 | 46.9 | 22.0 | 22.8 | 3.5 | 4.2 | 6.8 | 8.0 |

While the number of Roman Catholics at all ages averaged 24.4 per cent of the total population, the proportions in the age groups under 25 were above the average and those in the groups from 25 years onwards were below the average. Apart from minor exceptions in the case of Methodists, the position was reversed in each of the other main religious categories. Generally, the Roman Catholic population is not only the most youthful but tends to have an increasing proportion of young persons in relation to the other denominations.

TERMINAL EDUCATION AGE

Table 20 shows the distribution of the population aged 15 years and over by terminal education age. Figures are given by sexes and by individual years of age from 15 to 24 and age groups thereafter. As an indication of the relationship between education and occupation, the information is also analysed by Occupation Orders in Table 21. The figures in the "Not applicable" column of Table 20 relate mainly to students (3,215 males and 3,092 females); the balance (30 males and 25 females) represents persons who, through infirmity or for other reasons, never had any full-time education.

A broad comparison by sex and age groups is afforded by Table XVIII which shows the numbers of males and females at various terminal education ages expressed as percentages of the respective totals with stated terminal education ages in each age group. For all age groups, relatively more males than females finished their full-time education at 14 years of age.

(96843A) XXVIII

In comparing the figures for individual age groups, regard should be had to changes which have taken place in the minimum school leaving age. Although many children previously remained at school until 14 years of age, attendance to that age became compulsory in the County in 1926. This accounts in some measure for the relatively substantial decrease in the numbers of persons who left school under 14 years of age in the Census age group 45-54 compared with the older age groups. Similarly, the raising of the school leaving age to 15 years in 1957 affected persons in the age group 15-19, thus tending to vitiate comparison between that group and the remaining groups. It should also be noted that the figures in the age groups 15-19 and 20-24 cover only persons whose full-time education had ceased and thus exclude considerable numbers, particularly in the 15-19 age group, still in full-time attendance at educational establishments; 25.9 per cent of the boys and 26.8 per cent of the girls aged 15-19 were in this excluded category.

Table XIX compares, in respect of selected Occupation Orders, the distribution of males and females by terminal education ages expressed as percentages of the respective totals with stated terminal education ages in each Order. The Orders shown are those in which the number of males or females, as appropriate, with stated terminal education ages was 1,000 or more.

| | | | | | | | |

In the case of males, close on 88 per cent of drivers of stationary engines, cranes, etc. (Order XVII) and of labourers (XVIII) had left school before 15 years of age. Other high proportions were 79.2 per cent for textile workers (X), construction workers (XV) and transport and communications workers (XIX), 78.6 per cent for farmers, foresters, fishermen (I) and 76.3 per cent for painters and decorators (XVI). Among the largely non-manual workers, 69.5 per cent of clerical workers (XXI), 71.9 per cent of administrators and managers (XXIV), 73.6 per cent of armed forces (XXVI) and 88.5 per cent of professional, technical workers, artists (XXV) continued their full-time education until 15 years of age or later. Of those in Orders XXIV and XXV, 9.8 per cent and 45.9 per cent, respectively, had terminal education ages of 20 and over.

As regards females, 85.5 per cent of textile workers (Order X) and about seven out of every ten clothing workers (XI), food, drink and tobacco workers (XII) and service, sport and recreation workers (XXIII) had terminal education ages under 15 years. On the other hand, 86.1 per cent of clerical workers (XXI) and 89.4 per cent of professional, technical workers, artists (XXV) had terminal education ages of 15 or over, with 40.2 per cent of those in Order XXV having remained full-time at educational establishments until at least 20 years of age.

OCCUPATIONS AND INDUSTRIES

In comparing the economic activity information in this Report with that from earlier Censuses, it should be borne in mind that the 1961 information was collected in respect of persons aged 15 years and over, i.e. those who had reached the minimum school leaving age, whereas the corresponding limits adopted at the 1951 and 1926 Censuses were 14 and 12 years, respectively. Questions on occupations and industries were not asked at the 1937 Census.

Occupations: Table 22 gives figures of males and females aged 15 years and over, distinguishing between the occupied or economically active population (including persons temporarily out of work) and the economically inactive. The occupied population figures are analysed by the full list of occupation Orders and groups and by industrial status. In Table 23, the occupied population is further analysed by sex, marital condition and age.

Of the 192,860 persons aged 15 and over in the County, 112,710 or 58.4 per cent were occupied, compared with a 1951 ratio of 58.0 per cent for occupied persons aged 14 and over. The percentage for males was 86.3 (1951:- 86.8) and for females 33.2 (1951:- 31.8).

Males Females Percentage Percentage Age Total Occupied of occupied Total Occupied to total to total 73.5 15-19 10,872 7,986 11,058 7,354 66.5 8,538 8,038 94.1 8.940 5,708 63.8 20-24 34,936 34,618 99.1 37,415 12,077 32.3 25-44 25,613 7,695 26,489 96.7 29,017 26.5 45-64 706 65 and over 10,949 2,915 26.6 14,646 4.8 91,784 Total 79,170 86.3 101,076 33,540 33.2

TABLE XX

Table XX shows the numbers of occupied males and females by broad age groups together with the proportion of occupied to total in each group. Some three-quarters of the boys and two-thirds of the girls in the group 15-19 years were occupied. Thereafter, the proportion for females declined at each higher age group, whereas that for males increased to a peak of over 99 per cent in the group 25-44 years. At ages 65 and over, more than one in every four men was occupied as against less that one in twenty women. Comparable 1951 and 1926 ratios are not available, as information on the occupied population was analysed by ages only for Belfast County Borough and Northern Ireland as a whole.

In relation to the total persons (including children under the minimum school leaving age), the occupied population represented 41.1 per cent compared with 43.1 per cent in 1951. The proportion for males decreased from 30.7 to 28.9 per cent and for females from 12.4 to 12.2 per cent.

Among occupied males, 33.8 per cent were single, 64.4 per cent were married and 1.8 per cent were widowed and divorced. The corresponding percentages for females were: - single 62.9, married 32.0 and widowed and divorced 5.1. Comparable proportions at earlier Censuses are not available on a County basis. Almost 84 per cent of the total occupied married women were classified under six occupation Orders, viz. textile workers (Order X), clothing workers (XI), clerical workers (XXI), sales workers (XXII), service, sport and recreation workers (XXIII) and professional, technical workers, artists (XXV). In these Orders, the proportion of married women to total females varied from 42.8 per cent for textile workers to 21.6 per cent for clerical workers.

The following statement sets out the percentage distribution of the occupied population by industrial status.

| | Persons | Males | Females |
|---|---------|-------|---------|
| | % | % | % |
| Employers and managers Foremen and supervisors Workers on own account (without employees) Apprentices and articled clerks Other employees Out of work | 7.8 | 9.7 | 3.8 |
| | 2.7 | 3.3 | 1.6 |
| | 10.7 | 13.5 | 3.9 |
| | 3.1 | 3.8 | 1.5 |
| | 69.0 | 62.7 | 83.7 |
| | 6.7 | 7.0 | 6.0 |
| | 100.0 | 100.0 | 100.0 |

XXX

Table XXI shows the numbers of males and females in the numerically important occupation Orders and the proportions per 1,000 of the total occupied persons of each sex.

| XXVI. | Armed forces (British and foreign) | 1,068 | 13 | • | • |
| | Total Orders above | 77,702 | 981 | 32,956 | 983 |
| | Total occupied population | 79,170 | 1,000 | 33,540 | 1,000 |

Note:- Figures are given only for Orders showing proportions of 5 or more per 1,000 occupied males or females.

Approximately 57 per cent of the occupied males were to be found in five Orders as follows: - I(Farmers, foresters, fishermen) 18.1 per cent, VII (Engineering and allied trades workers n.e.c.) 10.0 per cent, XVIII (Labourers n.e.c.) 11.6 per cent, XIX (Transport and communications workers) 8.4 per cent and XXII (Sales workers) 9.1 per cent. In the case of occupied females, a total of 81.7 per cent was classified to-Orders X (Textile workers) 10.1 per cent, XI (Clothing workers) 9.5 per cent, XXII (Clerical workers) 20.5 per cent, XXII (Sales workers) 11.8 per cent, XXIII (Service, sport and recreation workers) 18.9 per cent and XXV (Professional, technical workers, artists) 11.1 per cent.

Social Classes and Socio-economic Groups: Table 24 analyses the population aged 15 years and over by social class, socio-economic group and age group. The social class analysis applies only to occupied and retired persons excluding members of the armed forces and persons with inadequately described occupations. In the socio-economic group section of the Table, the heading "Indefinite" relates to persons with inadequately described occupations. The "Not applicable" heading covers students and persons economically inactive other than institution inmates and retired persons, those in the two last named categories being classified as appropriate to the socio-economic groups.

The percentage distribution of the persons allocated to the social classes was as shown below.

| | | | Males % | <u>Females</u> ·% |
|----------|------|--------------------------------|------------|----------------------|
| | I. | Professional, etc. occupations | 2.6 | 0.5 |
| | II. | Intermediate occupations | 23.4 | 19.5 |
| | III. | Skilled occupations | 40. 2 | 39.7 |
| | IV. | Partly skilled occupations | 20.6 | 37.0 |
| | ν. | Unskilled occupations | 13.2 | 3.3 |
| (96843A) | | xxx1 | 100.0 | 100.0 |

Within the framework of the classification, 55.7 per cent of the males were manual workers, 25.3 per cent were non-manual and 19.0 per cent were agricultural workers. The percentages for females were: - manual 42.3, non-manual 55.1 and agricultural 2.6.

Industries: Table 25 shows the distribution of the working population aged 15 years and over (excluding persons out of work) by sex, industry Order and Minimum List Heading. Separate figures are given for unskilled males and for married females. The numbers of males and females in the numerically important Orders and their proportions per 1,000 of the total working persons of each sex are set out in Table XXII.

| XXIV. | Public administration and defence | 5,054 | 69 | 1,268 | 40 |
| | Total Orders above | 72,888 | 990 | 31,014 | 983 |
| | Total working population | 73,588 | 1,000 | 31,537 | 1,000 |

Note: - Figures are given only for Orders showing proportions of 5 or more per 1,000 working males or females.

Orders III to XVI inclusive form the broad group of manufacturing industries. They accounted for 31.2 per cent of the total working population, the proportions for males and females being 28.0 and 38.6 per cent respectively of the number of working persons of each sex. Order XX, Distributive trades, was the largest individual Order, accounting for 14.4 per cent of the total working persons. It was followed by Order I (Agriculture, forestry, fishing) 13.0 per cent and Order X (Textiles) 10.6 per cent.

TABLE 2 - Population, 1821 - 1961

County

Notes: -

- (1) The term "Population" is defined in Part I. The figures for 1821 and 1831 exclude members of H.M. Forces.
- (2) The figures given are for the County as constituted at the date of each Census, exclusive of that part of Belfast formerly within it. Belfast, which was enlarged in 1853 and 1896, became a County Borough in 1898. The County boundaries were extended by the transfer of

 (a) the portion of Lisburn Urban District formerly situated in County Down pursuant to the Local Government (Ireland) Act, 1898.

 (b) the portion of County Londonderry taken into Portrush Urban District under the Local Government Board (Ireland) Provisional Order Confirmation (No.3) Act, 1914.
- (3) Since 1911 the Censuses were taken at irregular intervals.

^{*} Excluding 49.425a. ir. 13p. under the larger rivers, lakes and tideways; and of 5a. ir. 5p. the area of the Maiden's Islands in the North Channel.

[/] Excluding £37,161 Os. the valuation of electricity, gas and water undertakings, salmon and eel fisheries, etc.

⁽a) A portion of Larne Rural District with a population of 253 in 1951 was transferred to Larne Municipal Borough in 1958.

⁽b) A portion of Lisburn Rural District with a population of 1,208 in 1951 was transferred to Lisburn Urban District in 1955.

⁽c) A portion of the former Belfast Rural District with a population of 20,215 in 1951 became the Urban District of Newtownabbey in 1956.

⁽d) A portion of the former Belfast Rural District with a population of 1,508 in 1951 was transferred to Antrim Rural District in 1958.

⁽e) At Census day Antrim was a town constituted under the Towns Improvement (Ireland) Act, 1854. It ceased to be such as from 1st April, 1962, when the functions of the Town Commissioners were transferred to Antrim Rural District Council.

⁽f) This D.E.D. was reconstituted and transferred to Antrim Rural District following the abolition of Belfast Rural District in 1968.

⁽g) Mossley town is in the D.E.D's of Ballyduff (4) and Carntall (8). The entire town contains 300 persons.

⁽h) Crumlin town is in the D.E.D's of Ballynadrentagh (5), Crumlin (13) and Seacash (22). The entire town contains 394 persons.
