API Keys

Create API Key

Get started creating API Keys

API keys help protect the sensitive areas of your SendGrid account (e.g. contacts and account settings). To control and limit access of API users, you can create multiple API keys, each with different permissions.

API Key Created

Please copy this key and save it somewhere safe.
For security reasons, we cannot show it to you again

Copied!

The screenshot shows a workflow editor for a step named "ValidateTwitterFollowerCount". The "Request Body" section contains a JSON object with three fields, each containing a dynamic content placeholder:

```
{
  "followersCount": "Followers count x ";
  "tweettext": "Tweet text x ";
  "Name": "User name x "
}
```

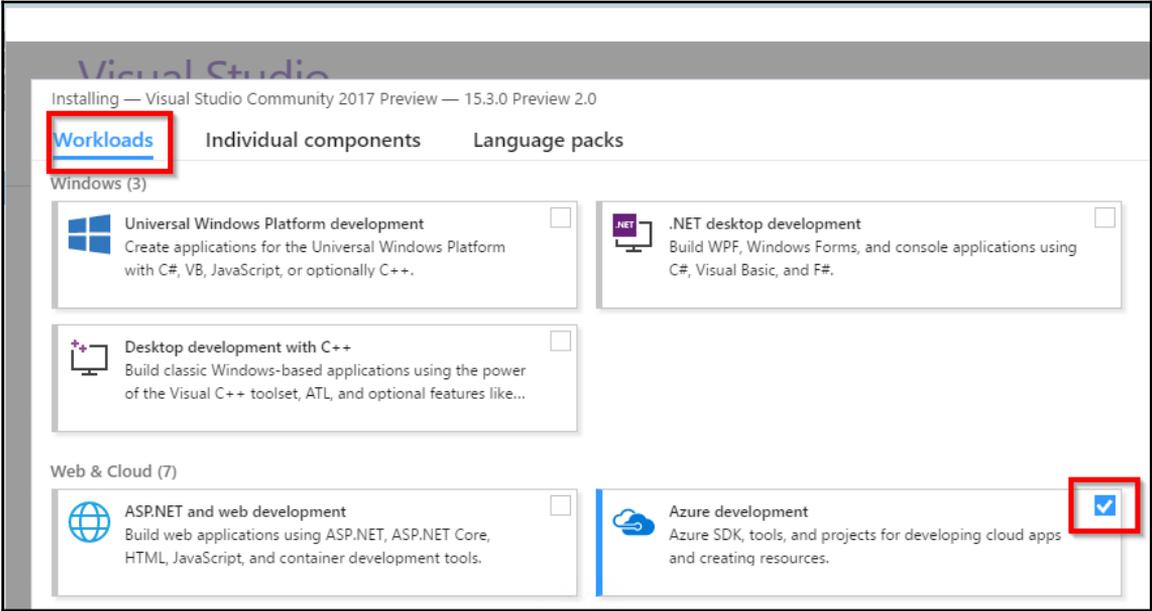

Below the request body is a "Show advanced options" dropdown and a "+ New step" button. To the right, a "Search dynamic content" panel is open, showing a search for "user". The results list several dynamic content items:

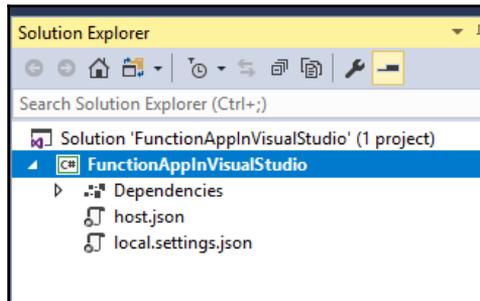

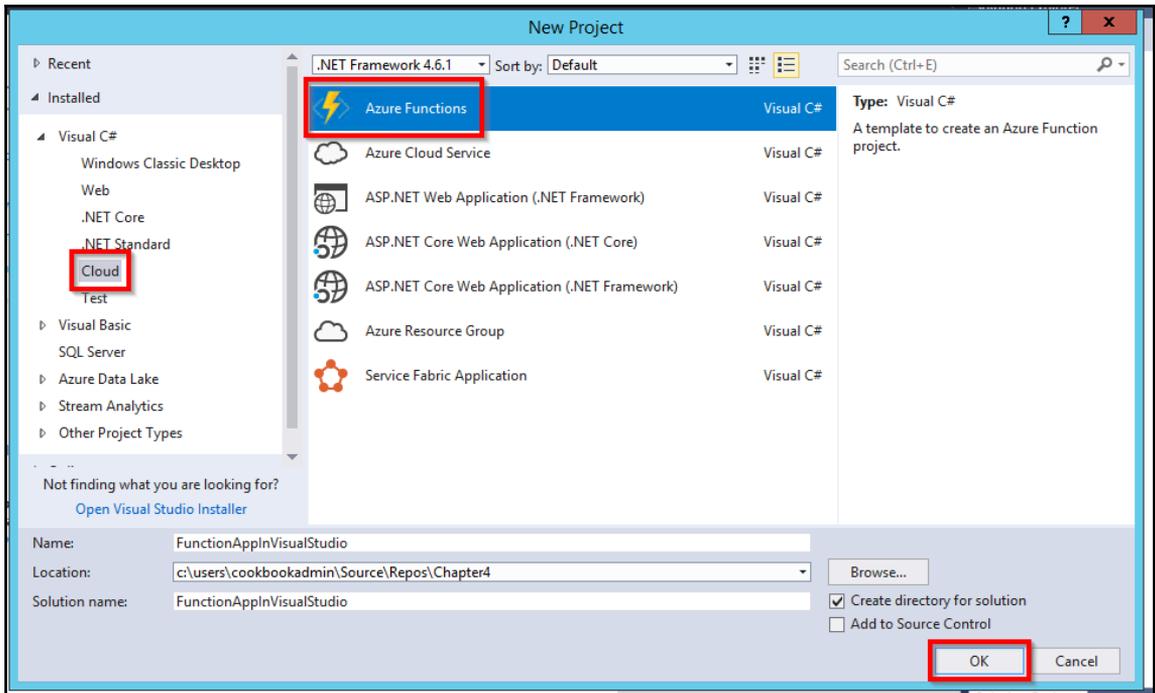

- User name of the person who posted the original tw...
- Original tweet user Description
User description
- Original tweet user statuses count
User status count
- Statuses count
User status count
- User id
Twitter Id of the user
- User mentions
List of users mentioned in the tweet
- User name
Screen name of the user

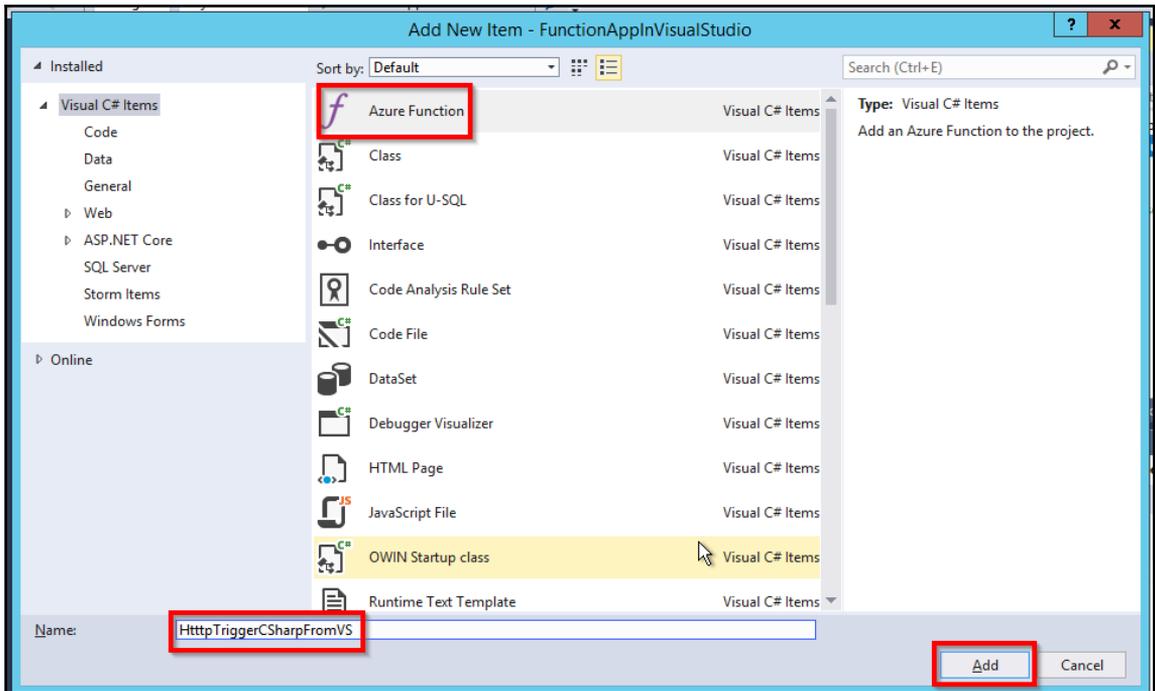

This screenshot shows a dynamic content search panel for the event "When a new tweet is posted". The search bar contains "Search dynamic content". A "See more" button is visible. The results list the following dynamic content items:

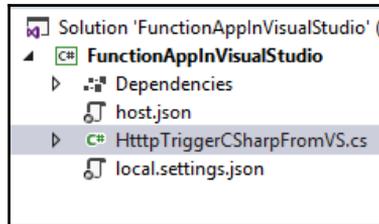

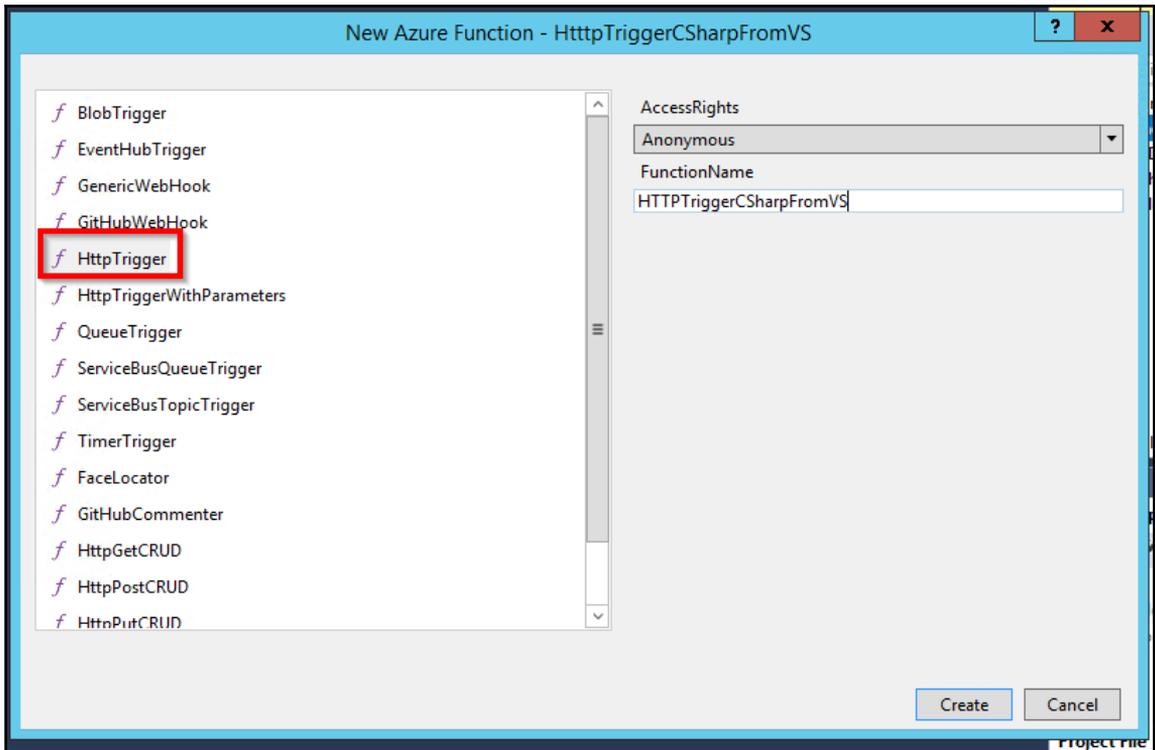

- Body
- Description
User description

The image shows a user interface for adding a custom streaming data tile. At the top, there is a title "Add a custom streaming data tile" and a subtitle "Choose a streaming dataset". Below this is a yellow button with a plus sign and the text "Add streaming dataset". Underneath is a section titled "YOUR DATASETS" which contains a single dataset entry "Requests" enclosed in a yellow border. A red box highlights the "Requests" text, and a mouse cursor is pointing at it. Below the dataset list is a link "Manage datasets". At the bottom, there are three buttons: "Back", "Next", and "Cancel". The "Next" button is highlighted with a yellow background and a red border.

- Extensions

The screenshot displays the App Service Editor interface. On the left, the 'EXPLORE' pane shows a file tree with 'WORKING FILES' containing 'host.json' and 'WWWROOT' containing several folders and files. The 'host.json' file in the 'WWWROOT' folder is highlighted with a red box. On the right, the code editor shows the content of 'host.json' with a red box around the text:

```
host.json
1 {
2   "watchDirectories": [ "SharedClasses" ]
3 }
```
