

More than

# 200,000 RESOURCES

NOW AVAILABLE THROUGH RESEARCH4LIFE

Research4Life provides institutions in lower income countries with online access to academic and professional peer-reviewed content. We aim to improve teaching, research and policy-making in health, agriculture, the environment and other life, physical and social sciences.

high-quality  
books

peer-  
reviewed  
journals

databases  
and  
reference  
sources

Since 2001, Research4Life has provided researchers at more than 11,000 institutions in over 125 lower- and middle-income countries with free or low-cost online access to resources. We do this in partnership with:

- WHO, FAO, UNEP, WIPO, ILO
- Cornell and Yale Universities
- The International Association of STM Publishers
- 200+ international publishers

**Eligibility.** Not-for-profit institutions from eligible countries, areas and territories can register for free or low-cost access to international scientific journals, publications and databases. Visit [research4life.org/access](http://research4life.org/access) for more information.

**Features.** The content portal is available in five languages. Find full text articles, with powerful searching and filtering functionalities. Save your searches and bookmark favourite content, and create search alerts.

**Training and support.** We offer free modules for librarians, researchers and professionals. We also run webinars and MOOCs to help you make the best use of Research4Life resources. Discover more on [research4life.org/training](http://research4life.org/training).

With the information and knowledge I obtain through Research4Life, I feel more confident in practising and implementing respected medical expertise from around the world.

Viet Nam

Getting reliable updated information is one of the main challenges for our institution. Research4Life provides updated information that is highly needed for capacity building and evidence-based planning.

Tanzania

I can't imagine being able to do my research without Research4Life. Neurosurgery is a rapidly evolving field, and Research4Life allows me to read what I need to be able to stay up to date.

Nepal

Our heartfelt thanks and appreciation to Research4Life. Words are inadequate to express how this is key to fill the gaps that have existed in our library collection over the past years.

Liberia

Thanks for the opportunity to participate in your initiative. Your support means a great deal to our organization, aiding to our research and conservation efforts.

Colombia
