PREFACE

Dear Users,

Results of the Census of Population, Households and Dwellings in Republika Srpska and BiH 2013 (hereinafter: Census) carried out on the territory of Republika Srpska are published by the Republika Srpska Institute of Statistics, as the legally designated competent authority, as provided for in Article 2 of the Law on Processing and Publication of Results of the Census of Population, Households and Dwellings 2013 in Republika Srpska ("Official Gazette of Republika Srpska", No. 82/16).

The Institute is publishing the Census results in a timely manner, within the timeframe stipulated in Article 4 of the said Law. The results are published in accordance with the Data Processing Programme, which was adopted in line with the Law after the programme had been discussed and approved by the Census Bureau of Republika Srpska.

The Census was carried in the period between 1 and 15 October 2013, in accordance with the Law on Census of Population, Households and Dwellings BiH 2013 ("Official Gazette of BiH", No. 10/12 and 18/13) and the Law on Organization and Implementation of the Census of Population, Households and Dwellings 2013 in Republika Srpska ("Official Gazette of Republika Srpska", No. 70/12 and 39/13).

In addition to the current legal acts and subordinate legislation, the Conference of European Statisticians Recommendations for the 2010 Censuses of Population and Housing and other relevant international standards were also applied in the Census preparation and activities; these standards serve to provide guidance and assistance to countries in the planning and conducting of their population and housing census, to facilitate the comparability of the data at regional level through the selection of a core set of census topics, and to harmonize definitions and classifications.

Census is the most complex and most comprehensive statistical activity. It should be noted that the Census implementation on the territory of Republika Srpska involved 6,685 enumerators, 868 municipal/city instructors and 79 entity instructors. In 2,756 settlements, 414,847 households were enumerated.

The Institute performed the complex and important activities within the Census professionally, in accordance with legal regulations and statistical principles; therefore, as a result of the Census, users are provided with reliable and useful data that will be published by the Institute in this release, as well as in other thematic Census publications.

| 17. HOUSEHOLDS ENGAGED IN AGRICULTURAL ACTIVITIES, REPUBLIKA SRPSKA LEVEL AND MUNICIPALITY/CITY LEVEL | 78 |

METHODOLOGICAL EXPLANATIONS

What is Census?

The Census is defined as the statistical survey that produces at regular intervals (usually every ten years) the official counting of the population, households and dwellings in the territory of a country.

The main objective of the Census is to provide a relevant set of data on the number and geographic distribution of the population and its demographic, socio-economic, cultural and other characteristics, which serve in the preparation and implementation of development plans in all areas of the social and economic life.

In addition, the Census serves to collect a significant fund of data on the number, type, location, occupancy status, age and other characteristics of conventional dwellings and housing arrangements, as well as data on the most significant characteristics in terms of agricultural capacities owned and used by individual households.

Given the number of units to be enumerated and the number and diversity of modalities in questions, the Census represents the most complex statistical survey that requires substantial financial resources and a specific organization (outside the framework of regular statistical surveys).

The Census includes the process of collecting data through fieldwork, data processing, aggregating individual information, and evaluation, dissemination and analysis of data.

Duration of enumeration

The enumeration of population, households and dwellings in Republika Srpska and BiH began on 1 October 2013 at 9 AM and it was completed on 15 October 2013 at 9 PM.

Legal framework

The Census of Population, Households and Dwellings 2013 was carried out in accordance with the Law on Census of Population, Households and Dwellings BiH 2013 ("Official Gazette of BiH", No. 10/12 and 18/13), the Law on Organization and Implementation of the Census of Population, Households and Dwellings 2013 in Republika Srpska ("Official Gazette of Republika Srpska", No. 70/12 and 39/13) and the Law on Processing and Publication of Results of the Census of Population, Households and Dwellings 2013 in Republika Srpska ("Official Gazette of Republika Srpska", No. 82/16). These legal acts regulate the content, preparation, organization and implementation of the Census, duties and obligations of Census participants, duration of enumeration, processing and storage of data, financing of the Census, penalty provisions, and publication of data.

Territorial organization

The Census on the territory of Republika Srpska has been published in line with the administrative-territorial organization of Republika Srpska, pursuant to the Law on Territorial Organization of Republika Srpska ("Official Gazette of Republika Srpska", No. 69/09 and 70/12) and the Decree on Settlements making up the Territory of the Local Self-Government Unit ("Official Gazette of Republika Srpska", No. 4/10, 26/11 and 74/12). According to the said administrative organization, which due to the Census activities could not have been changed in the period between 1 January 2013 and 31 December 2013, Republika Srpska had 6 cities, 57 municipalities and 2,756 settlements.

Settlement

A settlement is part of the territory of the local self-government unit, with constructed buildings for housing, basic utilities and other facilities required to meet the needs of the population inhabiting the settlement on their territory.

Method of enumeration

The Census 2013 was conducted in the traditional way, through interviews, following the "door-to-door" principle. Enumeration was carried out using Census questionnaires, namely the Personal Questionnaire (Questionnaire P-1) and the Household and Dwelling Questionnaire (Questionnaire P-2). Each enumerator was required to enumerate a specific area, i.e. enumeration area, where all Census units were to be enumerated.

Completed courses which did not provide a regular school certificate (e.g. typist, bookkeeper, hairdresser courses, and similar) were not taken into account as answers to this question. Instead, an answer about the previously completed school within the formal educational system was entered. If a person studied abroad, the answer should have referred to an equivalent school in the country.

Computer literacy

Data on computer literacy were collected for persons aged 10 years and older. Persons were given the possibility to declare that they can perform one or more operations using a personal computer (text processing, tabulation, use of e-mail and use of the Internet) or to declare that they cannot perform any of these operations.

Computer literacy is defined as persons' ability to process a text, create a table, use e-mail and use the Internet. A person **with partial computer skills** is a person who can perform at least one of the above operations. A person who cannot perform any of these operations is considered **computer illiterate**.

Economic characteristics of the population

Economically active population

Labour force of active population covers employed and unemployed persons.

Employed persons are persons aged 15 years and over who, during the reference week: performed some work for at least an hour for pay or profit, regardless of their formal status, or did not perform any work, but had a job to return to.

The employed segment is composed of:

- Employees (employed persons receiving pay or profit for their work);
- Self-employed (employers who manage a business entity and employ one or more employees, and persons who work for their own account and do not have employees);
- Unpaid contributing household members (household members working in the family business).

Unemployed persons are persons aged 15 years and over who:

- In the reference week, did not engage in any activities for pay or profit;
- Spent four weeks (reference week and three preceding weeks) actively looking for employment or, having found a job, will start to work in the near future;
- Would be able to start working in the following two weeks, should they be offered employment.

Economically inactive population

Inactive population comprises all persons aged 15 years and over who, during the reference week, did not perform any work and who, during the four weeks (reference week and three preceding weeks), did not seek a job, as well as persons who would not be able to start working in the following two weeks, should they be offered employment.

Difficulties in performing daily activities (disability)

Data on difficulties in performing daily activities were included in the scope of the Census 2013 in order to collect main data on persons with disabilities. When defining the methodological guidelines for the collection of data on disability, the sociological approach according to which a person is allowed to consider that, despite the existence of a particular health problem, he/she has no difficulties in performing daily activities at home, at school or at work, thanks to the support of their environment, the use of appropriate aids and the like, was applied.

With the aim of obtaining complete information, the Census Questionnaire P-1 included a set of questions pertaining to six types of problems. Persons provided answers whether, and to what extent, they had difficulties in performing daily activities at home, at school or at work, due to problems with (1) seeing, (2) hearing, (3) walking, (4) remembering/concentration, (5) independence in dressing/personal hygiene, or (6) communication.

Households

According to international recommendations, a household is a core census topic, while the question on the number of household members belongs to derived core topics, i.e. the topics that ought to be derived through the processing of Census data. In the world, there are two concepts that are applied in defining **private households**. According to the so-called Housekeeping concept, which is applied in our country, a household refers to persons living together who make common provision for essentials for living (food, housing, etc.). A household may be a one-person household (one person living alone in a dwelling or a part thereof, who makes provision for his/her own needs) and a multi-person household (a group of two or more persons, related or unrelated, who make common provision for food and housing). A dwelling may be occupied by one or more households. In contrast to this concept, many countries that conduct censuses on the basis of registers apply the household-dwelling concept, according to which household members are all persons living together in a housing unit; thus, the total number of households is equal to the number of persons living in the housing unit.

Housing units

Housing units in the Census 2013 are dwellings (in the building/house), collective (institutional) living quarters, inhabited office premises, other housing units, and homelessness.

Detailed data were collected for dwellings (in the building/house) only.

Building/house is any construction whose structure consists of external walls, covered by roof structure, with one or more entrances (with one or more house numbers). A building/house may be used for habitation, for business activities, or for the storage of material goods.

Dwelling is a construction unit intended for habitation, consisting of one or more rooms (with floor space of four or more square metres), with adequate auxiliary premises (kitchen, pantry, hallway, bathroom, toilet, etc.) or without them. It may have one or more separate entrances.

In general, the Census covers completed dwellings only. A dwelling is considered completed if all planned construction, installation and finishing works have been performed. A completed dwelling may be located in a building/house which has not been entirely completed, that is, in which there are dwellings that have not been completed.

Room is a space intended for habitation, separated from the rest of the dwelling by permanent walls, at least two meters high, having direct daylight and at least 4 square metres of floor space, at least two metres wide, which means that a bed for an adult can be placed in it. Direct daylight is the light that gets through the window of the room, coming from an open space (street or yard), terrace or skylight.

Dwellings are classified into eight groups: one-room, two-room, three-room, four-room, five-room, six-room, seven-room, and eight or more-room.

Total useful floor space (m²) is the sum of floor spaces of all rooms, kitchen, bathroom, toilet/WC, pantries, hallways and other auxiliary premises within the dwelling, including portions of floor spaces of loggias (75% of the total floor space), covered terraces (50% of the total floor space), balconies and open terraces (25% of the total floor space). Floor space of the dwelling also includes the floor space of a room or kitchen which is in terms of construction separated from the main premises of the dwelling (located in the same building/house or in other building/house at the same address, but with separate entrances, used by a household throughout the year). Floor space of the dwelling also includes the floor space of a room (within the dwelling) used for business activities (e.g. a sewing workshop, a law office, etc.).

Use of the dwelling

For habitation only is an occupied dwelling used for habitation throughout the year, by one or more households, regardless of the grounds on which the household uses the dwelling.

For housing and business activities is an occupied dwelling complying with the definition of a dwelling, while in part of the dwelling occupied by one or more households, a business activity is also performed (e.g. sewing, hairdressing or shoemaking, rooms rented to tourists, law office, studio, dental office, representative office of a company, etc.).

For business activities only is an unoccupied dwelling that has not been structurally converted (adapted) into business premises and which is entirely used for business activity purposes.

For leisure and recreation is a temporarily occupied dwelling, entirely complying with the definition of a dwelling, which is used occasionally or during several months in a year, for leisure and recreation only.

For use during seasonal agricultural works is a temporarily occupied dwelling, entirely complying with the definition of a dwelling, which is used only at the time when agricultural works (shepherd's cottage, vineyard cottage, etc.) are performed.

Used by a household as other dwelling in the same building is a temporarily occupied dwelling, used by the household at the same address.

Used by a temporarily present person is a dwelling temporarily used by persons who are temporarily present at the place of the Census (students, workers, etc.).

Vacant dwelling is unoccupied (vacant) because it is: new and not yet occupied (although moving in is allowed); vacant due to moving, adaptation, repairs, etc.; dwelling owned by a person living in another dwelling or elsewhere, but the given dwelling is still not used or rented (e.g. a dwelling purchased for children who have yet to come to this place to study, etc.); abandoned dwelling (these are enumerated only if they are appropriate in terms of construction, or if they only require minor repairs to become appropriate for use).

Households engaged in agricultural activities

Data on households engaged in cultural activities were obtained through the Census of Population, Households and Dwellings in BiH, carried out between 1 and 15 October 2013, based on agricultural questions referring to the use/cultivation of agricultural land for agricultural production and livestock breeding.

Data on the number of households engaged in agricultural activities refer to multi-member and one-member households, while data on the number of so-called collective households engaged in agricultural activities (institutions for permanent care of children and adults, monasteries, convents, retirement homes, etc.) are excluded. A household can perform agricultural activities in the municipality of the enumeration or in other municipality on the territory of Bosnia and Herzegovina; however, data presented in this release refer to the municipality of the place of usual residence of the household head.

A household engaged in agricultural activities is a household that, in the Census of Population, Households and Dwellings in BiH 2013, provided one of the following answers:

- In the last 12 months, the household used/cultivated agricultural land for agricultural production on the territory of Bosnia and Herzegovina: arable land and gardens/kitchen gardens, orchards, vineyards, nurseries and other permanent crops (willows, Christmas trees planted for commercial purposes, etc.), meadows and pastures;

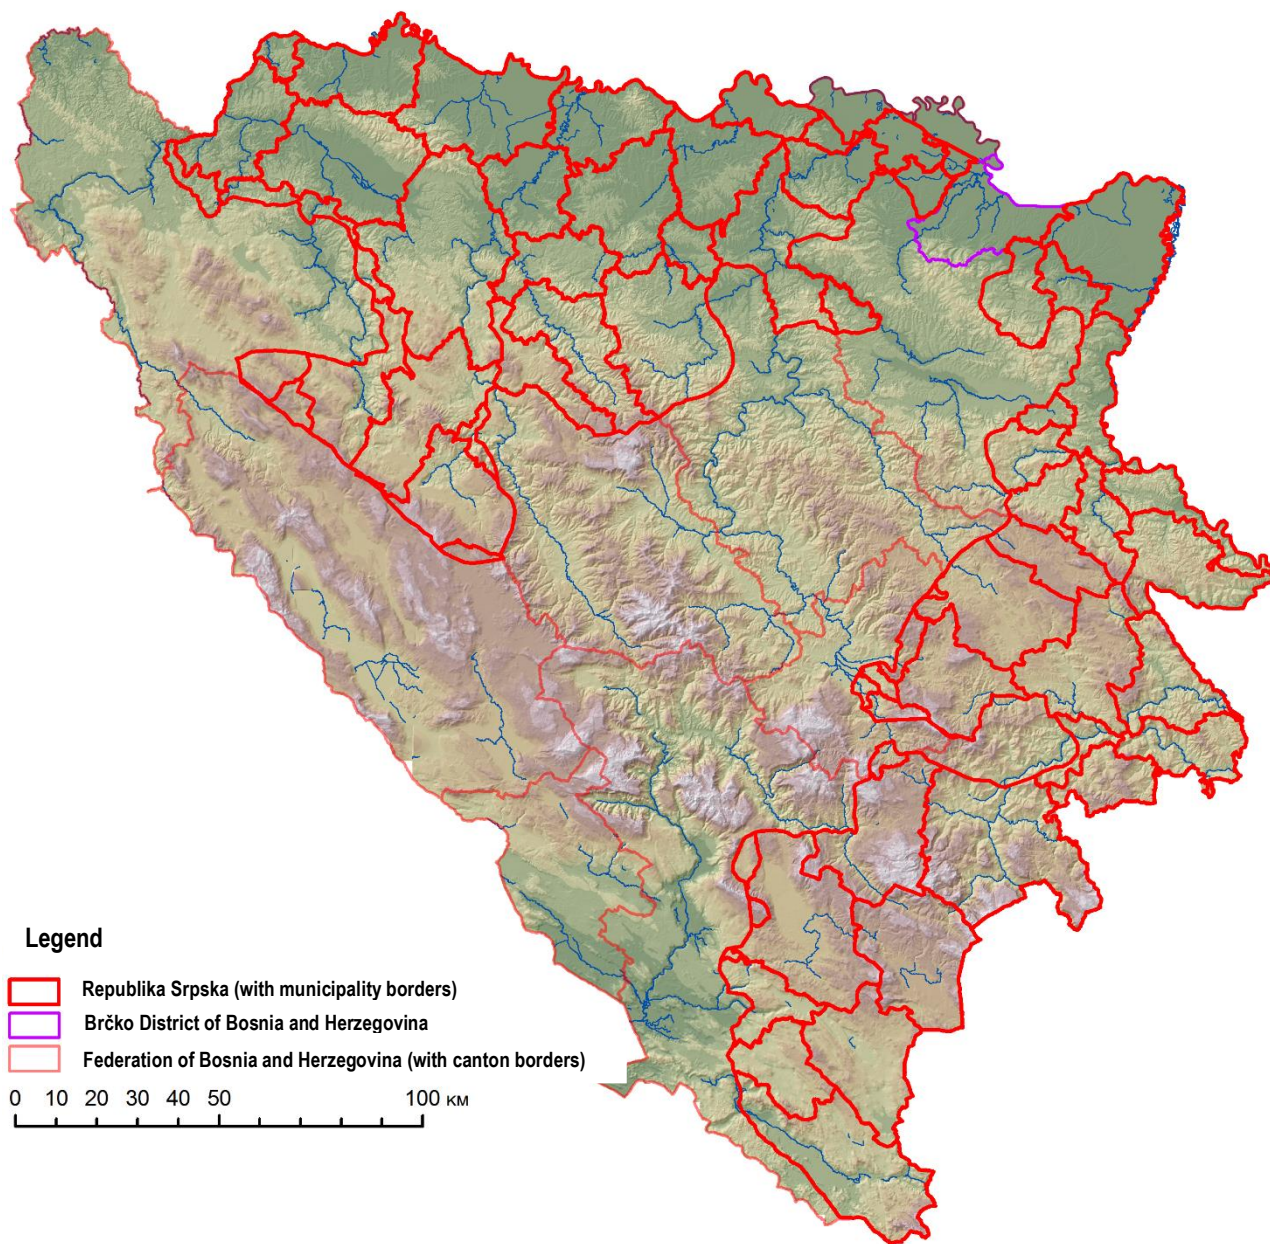

- On the day of enumeration, the household bred cattle, poultry or bees, including fish and mushroom farming.

Households engaged in agricultural activities that sell their products in the market are households that periodically or continuously sold their own agricultural products in the market (green market, purchase, own stores, or on the farm).

Due to rounding, some totals may not correspond with the sum of the separate figures.
